## Sony Bulk Blank 3.5" Disks

We feel that Sony makes the best 3.5" disk on the market. These are bulk packaged, double-sided disks. Disk labels are included. Order product number MD52.

<u>Qty.</u>	<u>Each</u>	<u>Total</u>
10	1.05	\$10.50
20	.96	19.20
50	.75	37.50
100	.65	65.00

## ImageWriter Ribbons

We offer the finest quality ImageWriter ribbons available. These black ribbons will work in either the ImageWriter I or the ImageWriter II printer. Unopened ribbons have a shelf life of 8 months to a year.

**BLACK RIBBONS:** Order product number RB02.

<u>Qty.</u>	<u>Each</u>	<u>Total</u>
2	4.50	\$ 9.00
6	3.25	19.50
12	3.10	37.20

**SINGLE-COLOR RIBBONS:** Order product number RB05. The following colors are available: Red, Green, Blue, Brown and Purple. You can mix or match colors.

<u>Qty.</u>	<u>Each</u>	<u>Total</u>
2	5.50	\$ 11.00
6	4.25	25.50
12	4.10	49.20

**4-COLOR RIBBONS:** Order product number RB10. These ribbons will work on the ImageWriter II printer only.

<u>Qty.</u>	<u>Each</u>	<u>Total</u>
2	7.50	\$ 15.00
6	6.95	41.70
12	6.75	81.00

## Blank 5.25" Disks

We have bulk double-sided, double-density 5.25" disks with Tyvek sleeves, write-protect tabs and labels. Order product number SY01.

<u>Qty.</u>	<u>Each</u>	<u>Total</u>
30	.49	\$ 14.70
50	.45	22.50
100	.42	42.00
1000	.39	390.00

## Pinfeed Computer Labels

At the request of many of our members, we will now carry pinfeed computer labels in a variety of hard-to-find sizes. All of the labels listed are pinfeed, one across, self-adhesive labels.

**5.25" Disk Labels:** This size of label is ideal for use on 5.25" disks. They measure 2 5/8" by 1 1/4". Order product number PF01.

<u>Qty.</u>	<u>Each</u>	<u>Total</u>
100	.08	\$ 8.00
500	.04	20.00
1000	.03	30.00

**3.5" Disk Labels:** These labels are ideal for use on 3.5" disks. They measure 2 3/4" by 2 3/4". Order product number PF02.

<u>Qty.</u>	<u>Each</u>	<u>Total</u>
100	.12	\$ 12.00
500	.05	25.00
1000	.035	35.00

**Video Cassette Spine Labels:** These labels are ideal for use on video cassettes. They measure 5 1/2" by 3/4". Order product number PF03.

<u>Qty.</u>	<u>Each</u>	<u>Total</u>
100	.12	\$ 12.00
500	.05	25.00
1000	.035	35.00

**Standard Mailing Labels:** The size of this label is ideal for use as mailing labels. They measure 3 1/2" by 15/16". Order product number PF04.

<u>Qty.</u>	<u>Each</u>	<u>Total</u>
500	.025	12.50
1000	.0155	15.50
5000	.005	25.00

## Joysticks

The Mach III Joystick is the best joystick on the market for the Apple IIe, IIc and IIGS. It's durable, self-centering and is easily adjusted. The Mach III features a fire button on top of the joystick handle. Order product number HA02. Club price is only \$33.50.

## System Savers

In our opinion, Kensington makes the best cooling fan, surge-protector and multi-outlet combination on the market. We have the IIGS System Saver available for \$75.00. Order product number KE02. We also have a platinum-colored System Saver available for the Apple IIe. It is product number KE03 and the club price is \$64.00.

## Mouse Pad

The ideal surface for moving your mouse because it prevents slippage on your desk, improving the mouse performance. It also helps prevent your mouse from picking up dust and dirt particles that are on your desk. Order product number MP01 for \$6.00.

## Back Issues of Scarlett

We have back issues of our club newsletter called *Scarlett* available for the years 1988 through 1990. You can order an entire year's set for only \$15.00. Order product number SC01 and specify which year's set you would like.

## Free Catalog

We'd be glad to mail one of these free catalogs to a friend (or even two). Just let us know the name and mailing address.

*Public Domain &  
Shareware  
Software  
for  
Apple IIGS  
Computers*

The Big Red Computer Club has a large library of public domain, freeware, and shareware Apple software. Members of BRCC can obtain copies of these programs. This provides an inexpensive and easy way to add programs to your personal software library.

**5.25" Disks for the Apple IIe, IIc and IIGS.** We have a large collection of 5.25" disks. Due to space limitations, they are not listed in this catalog. If you would like to have a complete listing of our disks, please send \$2 to Big Red Computer, 423 Norfolk Avenue, Norfolk, NE 68701.

**3.5" Disks:** The disk volumes listed on pages 4 through 10 of this catalog are 3.5" disk volumes. All of the programs on these disks are for the Apple IIGS owners but Apple IIe and IIc owners will find useful programs as well. All are ProDOS-based programs. Most of the disks contain several different programs. You will need 1.25 Megs of memory and System 5.0 to run the programs, although some require less memory. Most of the disks do not include the GS operating system. You must first boot the GS system disk before you can use run the programs.

**Copying Charge:** There is a charge for all copies made from the software library. This fee, which includes the cost of the blank disk, helps cover the costs of maintaining and upgrading the library. Postage is paid by BRCC for addresses within the United States and Canada. If you order from 1 to 9 disks, the price per disk is \$3.50. For an order of 10 to 39 disks, the price drops to \$3.10 per disk. For 40 or more disks, the price per disk is only \$2.90. You may mix and match between 5.25" disks and 3.5" disks.

**Documentation:** Because these programs are public domain they do not have printed documentation. Many of the disk volumes do include short instructions on the disk as how to operate the programs.

**Guarantee:** All programs in the library are believed to be either public domain or freeware except those which are specifically listed as shareware. Since these programs are public domain, freeware, or shareware, all programs are copied AS IS. We cannot guarantee their performance.

**Defective Disks:** If you receive a disk which has I/O errors and you are unable to copy the disk, you may return it and we will replace it with a new version of the same disk volume.

**Shareware Disks:** Shareware is copyrighted software. The author grants the user the right to copy and distribute the software within certain restrictions. The author also grants the user limited use of the program (typically for a tryout period of a week to a month), after which time the user is asked to pay the author a fee (buy the program) or erase the disk. Usually when the user buys the software by sending the fee, the author sends the user the most current version of the software, often with complete documentation. You can order shareware disks from Big Red for the usual copying fee of \$3.50 per disk. When you receive the disk, it will have complete instructions on how to pay the shareware fee. Please help support shareware authors.

**How to Order:** Send your orders to Big Red Computer Club, 423 Norfolk Avenue, Norfolk, NE 68701. Phone (402) 379-4680. Phone orders are welcome! Payment may be made with personal check, money order, Visa, or MasterCard. We accept U.S. funds only. Sorry, but we cannot accept American Express. We accept purchase orders from schools and government organizations. You do not have to be a member of Big Red to order the disks in this catalog.

## Games

### □ GS30 - Shareware Card Games†

If you like card games, this is a "must have" disk. It contains 5 different card games which all use SHR graphics. The games are Casino Solitaire, Slot Poker, Pyramid Solitaire, Monte Carlo and Poker Solitaire.

### □ GS39- GS Games†

This disk contains 4 action packed, freeware arcade games for the IIGS: Crackle, Quadronome, Copy Killers, and As The Link Turns. Copy Killers is a very fast action joystick controlled arcade game. The player is an FBI agent hunting for software pirates in a maze. You must shoot the pirates before being attacked by computer viruses.

### □ GS45- Orbizone† /Chips & Dips†

This disk contains 2 wildly amusing, arcade shareware games. Orbizone is an outer space shoot 'em up arcade game that is played with a joystick. It is based on the classic arcade hit Asteroids, and allows the user to design customized spaceships. In Chips and Dips the player must roam the screen collecting objects while avoiding killer robots. The player must climb ladders, and jump onto objects.

### □ GS52- Adventure Games

This disk contains IIGS adventure games and arcade action games. The adventures include Spellbinder, Castle Metacus, Original Cave Adventure and Beyond Tesseract. The arcade games include Worm, Battleship and Beast.

### □ GS58 - Fun and Games

This disk contains 11 IIGS games and 3 stunning graphics generation programs. The games include Tic Tac Toe, As the Link Turns, Follower, Romulan, Towers of Hanoi, Q\*Bert, Frogger, Concentration and Backgammon. The graphics programs include 2 from Jason Harper: Polygonia and Fillmaze. Both are wonderful 3 dimensional representations of IIGS animation. PlasmaLab is almost indescribable; it contains 5 different modules that generate animated fractal-like graphics.

### □ GS61 - Shareware Games†

One Armed Battle, a shareware game by Ken Franklin, is a six-reel slot machine game based on the classic game of dice called Oh Shoot or Devil's Dice. The game contains many humorous digitized sounds, and if a stereo card is attached to the IIGS, will playback in stereo. Mage Maze†, a shareware game written by Davis Hallwas, is a richly detailed IIGS maze game. Each maze has 10 levels that contain traps and doors that lead nowhere. All that's displayed on screen is a compass, and an animation that charts the players travels through the maze.

### □ GS65 - Entertainment†

Included are Wheel, a text based version of Wheel of Fortune; Yahtzee, a beautiful looking and fun to play version of the dice game classic; Fourplay, a Tetris-like strategy game; Tetrotrix, a Tetris clone with versions supplied in both English and French; Brian Greenstone's latest offering, Senseless Violence 2, a shoot 'em up with a socially responsible anti-drug message; and MatheMusic, a pendulum-like graphics display that plays heavenly music.

### □ GS72- Card Games†

Cartus Primus is one of the best shareware programs that we've seen. It allows you to play three-handed versions of the following card games: Cribbage, Gin Rummy, Pinochle, Hearts, and Pitch. The computer plays two of the hands and you can play the third. If you like, the computer will give you hints on which cards to play. There are also shareware versions of Buchre and Sheepshead on this disk.

### □ GS79 - Plunder!†

This disk contains a game from Dr. Ken Franklin. Plunder! is a game of chance and daring for 1 to 4 players of any age. In Plunder!, you and your competitors find yourself in a treasure room which is filled with various packages. You know most of the packages have treasures but one of them has a bomb. You must decide when to leave the room. If you wait too long and the bomb is uncovered, you lose.

### □ GS88 - PixMix

PixMix allows you to load any IIGS SHR graphic and the program then creates a jigsaw puzzle from the graphic. A graphic can be broken up into as few as 6 large blocks, or as many as 80 smaller blocks. Using the Apple Desktop with pull-down menus, PixMix allows blocks to be swapped with a simple click of the mouse. Twenty-five graphics are supplied along with the program.

### □ GS91 - Entertainment†

Tonight's Sky v3.0 is the finest planetarium program for the IIGS. This program is an integrated software package designed as a simple tool for amateur astronomers to prepare for an evening's observing. The program will calculate the positions of the Sun, Moon, and planets and plot them on star maps using various formats. Also included on the disk is PowerPlay, a game that has four different modules called FourPlay, Tron, PigNBull and Gridlock. Other games include Brain Teaser, Castle Metacus, Video Jazz and Color.GS.

### □ GS95 - Mini Prix

This is a grand prix car racing game that has you behind the wheel of a Formula 1 Lotus. A game screen is displayed that has side by side windows. One window shows your progress as you go around the track, and the other shows the view surrounding your car. All action is controlled with a joystick. Steer with the stick, accelerate with one button and brake with the other. The documentation for this game is written in French. This game must be booted from Slot 5, Drive 1.

### □ GS103 - Cosmocade Disk A†

Cosmocade is actually two games in one. On this disk, you get the Journey to Calibus game. It requires a joystick and involves lots of "shoot-up" action. You do not need to have Disk B (GS104) in order to play Journey to Calibus. In this game, you are in a space ship which is capable of firing missiles. As you fly over various terrains, alien ships and other objects fly

towards you. You can either avoid them or shoot them. When you shoot the objects, some of them will mutate to other objects. By collecting these mutant objects, you will be rewarded with good things such as better weaponry, more ammo and free lives. At the end of each level, there is a super alien which you must defeat. Calibus also comes with two editors which will allow you to create your own worlds.

### Cosmocade Startup Screen

### □ GS104 - Cosmocade Disk B†

This disk contains Naxos, the second game of the Cosmocade series. You can play Naxos without having the Journey to Calibus disk, but we strongly suggest that you get both disks. In Naxos, you're in a jungle which is inhabited by aliens. As they jump up from behind bushes or come along the path, you must shoot them before they shoot you.

### □ GS105- Space Clusters

This is a clone of Galaxian, an arcade-style game where space invaders swoop down from the top of the screen to attack your lone space craft. You use the joystick to maneuver out of the way and fire missiles at them until you have decimated their ranks. The animation on this program is very fast. It must be booted from Drive 5, Slot 1.

### □ GS110 - Milestones.2000†

This disk contains a computerized version of the classic children's card game in which you race your opponent by playing mileage cards. In addition to mileage cards, you also are dealt accident cards, remedy cards, speed limits, and prevention cards. You can use accident cards and speed limits to slow your opponent's progress. Remedy cards or prevention cards are necessary to recover from cards that your opponent has played against you. Milestones.2000 is another great game by Dr. Ken Franklin, the author of both Plunder! and One-Armed Bandit. It is reliefware and if you like the game, you are asked to send a donation to help the homeless.

### □ GS111- Tetris.Spinoffs†

This disk contains two new shareware games which are spinoffs of the basic Tetris game. They are Columns (version 1.1) and Antetris. In Columns, multi-color columns drop from the top of the screen. You can rotate the colors and maneuver the column. Whenever you get three of the same color in a straight line, they are removed from the screen and the other blocks above them drop down. The straight line can be horizontal, vertical or even diagonal.

Antetris takes a completely different approach. You start the game with a logjam of Tetris-like shapes arrayed at the top of the screen. You control a gun at the bottom of the screen and attempt to shoot the Tetris shapes as they begin to fall. There is a lot of strategy involved in choosing which shapes to shoot first, so that you cause the shapes to fall in an orderly

manner. If you shoot the wrong shape, you'll cause an avalanche and your position will be overcome. Also included on this disk are two new desk accessories. They are Mines.GS and Solitaire.NDA.

#### ☐ GS112- Arkanoid II Levels

This disk contains several new levels for use with Taito's Arkanoid II game. These levels were created by using the built-in editor that comes with the game. Also included on the disk are a cheat program for Arkanoid II which will help you to advance through the levels more quickly. Arkanoid II: Revenge of Doh is required for this disk. You can order Arkanoid II from Big Red for only \$15. The product number is TA61.

#### ☐ GS113-GS115 Bouncing Bluster†

This three-disk set contains a game which is a clone of Arkanoid. You use the mouse to move a paddle at the bottom of the screen. The paddle will deflect a ball which will then knock out bricks in the upper portion of the screen. As you hit some of the bricks, they will release power capsules. If you catch a power capsule with your paddle, it will give you additional features such as the ability to fire missiles or additional balls. As you clear each screen of the bricks, you advance to the next level.

Bouncing Bluster requires a special version of the System disk which is included on GS113. You must boot your system with this disk. Bouncing Bluster cannot be launched from the Finder or System 5.0. After GS113 has loaded, you will then need to insert the GS114 which contains the actual game. Disk GS115 contains a level editor which will allow you to design your own layouts of bricks.

#### ☐ GS117- Star Trek Classic GS†

As Captain Kirk, your next mission is to make the galaxy safe from the Klingons. You have 31 days to complete your mission. Use the Enterprise's navigational system, long and short range scanners, photon torpedoes and phaser banks! This shareware game is a complete rewrite of the classic text-based game that has been around for years. It's the same, fun game but with IIGS full-color graphics and music background. The program requires System 5.0.4, 1.5 megs of RAM and two 3.5" drives or a hard disk.

#### ☐ GS118- Memory Cards†

This disk contains three classic card games. They are Wisconsin Rummy, Hearts and Memory Cards. All of the games use the full graphic capability of the GS. Wisconsin Rummy is a typical gin rummy game in which you try to group your hand into groups of 3 or 4 cards that are similarly suited or are consecutive. Hearts is based on the card game by the same name. You take tricks but try to avoid taking any hearts or the Queen of Spades. Memory Cards is a version of Concentration. It is filled with amusing graphics and sound effects. As the game starts, a series of cards are shown, all face down. You try to find the pairs of cards which match. The player with the most matches is the winner.

#### ☐ GS119- Columns Version 2.0†

This is a Tetris-like game in which you manipulate falling blocks of different patterns in sequences of 3 or more blocks arranged horizontally, vertically or diagonally. When you succeed, the matched blocks disappear. The program features a rock and roll sound track, digitized sounds and great graphics. If you like Tetris, then you'll love this game.

## Desk Accessories & Utilities

#### ☐ GS20- Desk Accessories

This disk contains desk accessories for the IIGS (both NDAs and CDAs). It includes Area Code Table, ASCII table, Clock, Mouse Text, Toolshed, Write Protect, Calendar, Notepad, AlarmClock, Background Music, Brush, Confusius, Grass, Havok, Puncture Window, Panel V2.0, Panic, Rinky, Showpic, Showtext, and Two Apples.

#### ☐ GS47- GS/OS Goodies

This disk contains numerous files, programs and patches that will allow any IIGS user to customize their desktop. All files are compatible with System Disk 5.0.4. Nineteen Desk Accessories are provided, including: DeskTopPainter, Area Code reference guide, MemoPad, Screen Blanker, C1 Saver, Calculator, File View, Craps Game, ColorIt, Screen Inverter, Memorybar, Machine Language Error Guide, ShowPic, ShowText, Joystick Calibrator, Super Info, Write It Word Processor, and STS graphic creator. Other utilities include System Switch, SCSI Hacker, HDFormat, Disk Timer, IconEd, Print Buffer INIT and Custom GS/OS.

#### ☐ GS60 - JumpStart†

JumpStart v2.7 is a full featured program launcher and utility program that is a replacement for the Finder. JumpStart allows one to easily create a master menu, or run list, of programs and then launch any of those programs with a single mouse click. JumpStart does everything the Finder does, and then some. The disk also includes three desk accessories: Alarm Clock, Area Code CDA and MouseTrap CDA.

#### ☐ GS62 - Desk Accessories

Included are Desk Accessories that will allow one to format a disk while within programs that don't have a format option; several file utility DA's that will let you copy files, or view text files from within other programs; several that give added control to using an ImageWriter printer; a DA that will let you see what any font looks like; a DA that will locate for you any file located anywhere on a hard drive; DA's that display the time; DA's that play back digitized sound files; one that is a Tetris-like game; one that allows you to view the contents of any file; and a DA that is a mini word processor.

Several very useful utilities are included for those of you who telecommunicate. NuPak GS allows one to extract Macintosh files that have been packed by the compression utility StuffIt. Resource Spy allows you to take Mac fonts and icons and convert them to Apple IIGS format.

#### ☐ GS76 - Write-It! Desk Accessory†

This disk contains a fantastic NDA (New Desk Accessory) called Write-It!. It is a full-blown word processing program. Also included on the disk is a label making program, a program that makes audio cassette labels, and a RAM chip tester for expansion cards.

#### ☐ GS83 - IIGS Utility Programs†

This disk contains a number of "must-have" programs. Font/DA Mover allows you to load fonts and desk accessories "on the fly" from any disk.

A2.FX reads Macintosh formatted disks and converts files for ProDOS compatibility. Finder.Patcher provides numerous patches for the Finder to allow folders on the desktop and Open Apple command equivalents for all of the Finder's pull-down menus. RunQ provides a method to automatically launch a program of your choice on boot-up, thereby bypassing the Finder. UserNDA allows loading of IIGS Desk Accessories on the fly. File Manager is an NDA and FileTools is a CDA. Both programs allow you to copy files, etc. TransProgGS allows you to quit from a IIGS application and instantly run another program, without returning to the Finder. If you want the power to be your best, this disk will help!

#### ☐ GS99 - Twilight Screen Saver†

This disk contains a number of very useful programs for the IIGS. The neatest program on the disk is Twilight, a new screen saver CDev program. Twilight is a completely modular program written as a Control Panel Device. Once you have it installed, it will automatically blank the screen whenever the IIGS is inactive. There are several different types of 'blinker files' to choose from. They include a jigsaw puzzler, a star shooter, a worm program, a simple fade out and an animated 1.5" rotating globe. There is even a module that lets you draw the shapes to be animated.

Other programs on this disk include: First Start, TransProg program selector, Text Screen Saver CDA, Reslin Resource Editor, ClipIt NDA, Errorcodes CDA and the LoadFont NDA.

#### ☐ GS120- Icon Mania†

Supplied on this disk is every IIGS freeware and shareware icon editor in existence. There's IconEd, DICED, two versions of T.I.E. and Iconographer. Plus we've included hundreds of predesigned icons for just about every IIGS program that has ever been published. There are over fifteen different icons for the Trash Can. With this disk, there's absolutely no reason to not dress up your IIGS Finder program.

## Graphic Programs

#### ☐ GS21- CheapPaint†

CheapPaint is a shareware program by Earl Gehr. It is a full-featured paint program for the IIGS. It requires at least 768K of memory. CheapPaint allows you to create and modify artwork in the 320 by 200 Super Hi-Res mode. It has the usual features of most paint programs including copy and paste, lasso, fat bits, color cycling, brushes, stencils and add text.

#### ☐ GS22 - UtilityWorks†

UtilityWorks GS has the ability to load, save, and print any type of SHR graphic, an ASCII text file or an AppleWorks word processor file. Also included on this disk are several interesting text files including GS Tricks and IIGS Deprotects.

#### ☐ GS32- FontAsm†

This is the best shareware GS-font editor. It includes many features which are missing in other font editors including the ability to double a font's size.

#### ☐ GS40- Fractals & Animation

This disk includes 11 IIGS programs that create animated computer graphics that are dazzling, stunning and thought provoking. Included are: Bounce, a program that displays an animated Apple

logo; Fractal.GS, a program that creates beautiful fractal geometric images; Moire, a program that displays constantly moving animated graphics; Mosaic, a program that generates kaleidoscopic special effects; Setview, a program that generates fractal images and their Mandelbrot subsets; and SHKAlid, a program that generates kaleidoscopic animation.

**□ GS107 - YAFF**

This is my favorite fractal generating program for the IIGS. It allows you to create Manelbrot, Julia, Dragon or Biomorph fractal graphics. It is very easy to use and contains many useful help screens. The fractals can take a long time to generate (leave your computer on overnight for a large, complex one), but you can also limit the size of the area and the number of iterations so that a fractal is generated within 15 to 30 minutes. There are many pre-generated graphics on the disk, which give you a very good idea of how the different parameters affect the final output.

**□ GS122- Fkt Graphics†**

This program can be used to draw graphs of functions of the type f(x). You can use sine, cosine, tangent, etc. The computed graphs are SHR pictures which can be imported into DTP programs like AppleWorks GS. Some of the documentation is in German.

## SHR Clip Art

**□ GS50- Color Clip Art**

This disk contains hundreds of clip art images for use with 640-mode IIGS programs, such as AppleWorks GS and HyperStudio. Most of the graphics have been converted from Print Shop format. All graphics are supplied as Apple Preferred Format 640 mode \$CO filetype compressed graphics. All of them have gone through a lengthy conversion procedure that maintains all of the original colors, so no palette manipulation will be necessary.

**□ GS51- Black & White Clip Art**

This disk contains hundreds of clip art images for use with 640-mode IIGS programs, such as AppleWorks GS and HyperStudio. Most of the graphics have been converted from Print Shop format.

**□ GS59 - John's Clip Art Disk #1**

This disk contains a wide variety of SHR clip art which has been converted from public domain Macintosh graphics. This clip art is stored in Apple Preferred Format and is suitable for use with *AppleWorks GS*, *HyperStudio* and other GS applications.

**□ GS64 - John's Clip Art Disk #2**

This disk contains SHR clip art which has been converted from public domain Macintosh graphics. The clip art on this disk is stored in Apple Preferred format and is suitable for use with *AppleWorks GS*, *HyperStudio* or *GraphicWriter III*.

**□ GS67 - Joe's SHR Clip Art Disk #1**

This disk contains 75 IIGS Super Hi Res, 640 mode, Apple Preferred Format full screen graphics. All the graphics are black and white or grayscale, and are ideal for using with *AppleWorks GS*, *HyperStudio*, or any 640 mode IIGS paint program. Many of the graphics contain numerous small graphics that may be used as clipart for desktop publishing projects.

Included are graphics of famous and not so famous people, children, travel, animals, music, buildings, sporting activities, computers, the great outdoors, and much more.

**□ GS73 - Space Graphics**

This disk contains IIGS Super Hi Res scanned graphics from NASA. All are 320 x 200 mode graphics that can be viewed with the included slide show program, or can be loaded into any IIGS Paint Program.

**□ GS74 - John's Clip Art Disk #3**

This disk contains a wide variety of SHR clip art which has been converted from Macintosh graphics. This clip art is stored in APF and is suitable for use with *AppleWorks GS*, *HyperStudio*, and other GS applications.

Sample Graphics from GS74

**□ GS101 - SHR Christmas Graphics**

We've put together a wonderful collection of Christmas graphics on this disk. All of the graphics are in 320 mode and are suitable for use in most IIGS paint programs. Included are angels, Santa Claus's, a nativity scene, a reindeer and much more. We've included two graphic viewing programs on the disk to round out the selection. This disk would make a great holiday slide show.

**□ GS124- Dinosaur Clip Art**

Black and white clip art (640-mode) of dinosaurs that we have converted from the Mac. They're great for use in GS programs such as *AppleWorks GS*, *HyperStudio* or *HyperCard GS*. You can also import the graphics into *Publish-It! 3*. We've included a slide show program so you can easily view the entire disk and pick the graphics you need.

## SHR Graphics

**□ GS31- SHR Graphics**

This disk contains a collection of 35 Super Hi Res graphics stored in Apple preferred format. Pictures include Bugs Bunny, RoboCop, Enterprise, Darth Vader, Porsche and Tiger.

**□ GS42- Space Sights & Sounds**

This disk contains several digitized photographs and digitized sound files from NASA manned and unmanned missions. Included are graphics from Apollo moonlandings; the Voyager flyby mission to Jupiter, Neptune and Triton; and from the Space Shuttle. The digitized sound files include recordings from the first American to orbit the earth, the space shuttle lifting off the launchpad, and the historic sounds of Apollo 11 on the Moon.

**□ GS43- World's Best Art**

This disk contains 20 scanned SHR images of "The World's Best Art", including digitized reproductions of the works of Degas, Botticelli, Monet, Da Vinci, Dali, Wyeth, and Lautrec. The graphics are 320 x

200 mode \$C1 graphics, and can be loaded into virtually any IIGS Paint Program. Included also are 2 graphic viewers: *ShowPic NDA* is a New Desk Accessory and *GS.SYS16* is a stand-alone IIGS graphics viewer program.

**□ GS48- GIF Graphics**

This disk contains over 75 colorful graphics in the GIF format (Graphic Interchange Format) that can be viewed on any Apple II computer. Many of the graphics were originally IIGS SHR graphics, but converted to GIF and included on this disk as they look good at any resolution. Provided are 2 programs that decode and display GIF graphics.

**□ GS49- Star Trek**

This disk contains 19 digitized IIGS SHR graphics of the crew of the USS Enterprise from Star Trek and Star Trek: The Next Generation. Some were digitized from TV; others scanned from autographed photographs. *Windows*, a menu program to display these graphics is included. Also included are 2 *AppleWorks* database files (AW v3.0 required) that list every Star Trek episode aired through November, 1989.

**□ GS96 - 3200 Color Graphics**

Although the Apple IIGS is capable of displaying 4,096 different colors, it is incapable of displaying more than 256 colors at any one time. Or, so it seemed. That limitation is no longer valid, as this disk with 18 different graphics on it, will show you. Most of these graphics were created on other machines and then ported to the IIGS but they look great on the RGB monitor. A special viewer that allows you to see these 3200-color graphics is also included.

**□ GS116- 3200-Color Graphics #2**

This disk contains more 3200-color graphics and two different slide show programs which you can use to view them. 3200-color graphics are a special format of SHR graphics which makes it possible to have a different palette of 16 colors on each of the 200 different scanlines on your monitor. This makes it possible to create some truly stunning graphics. This type of graphic is only good for viewing in a slide show format and at the present time cannot be printed or used as clip art.

**□ GS125- 3200-Color Graphics #3**

This disk contains 18 different graphic images with 3200 colors. There is also a slide show program so that you can view the graphics. See Disk GS96 for more info on 3200 pixs.

Achilleos Graphic from GS125

**□ GS126- 3200-Color Graphics #4**

This disk contains 18 different graphic images with 3200 colors. There is also a slide show program so that you can view the graphics. See Disk GS96 for more info on 3200 pixs.

# Print Shop GS Graphics

The following disks contain multi-color graphics, fonts and borders for use with Print Shop GS. The graphics can also be used with either Labels, Labels, Labels or Publish-It! 3. The fonts and borders are only compatible with Print Shop GS. Each disk is shipped with a sheet showing all of the graphics on it. The graphics shown here are only a sample of what is on each disk.

**GS07- Print Shop GS Library #1**  
This disk contains 70 multi-colored graphics, 10 multi-colored borders, 10 single-colored borders and 15 fonts.

**GS08- Print Shop GS Library #2**  
This disk contains 70 multi-colored graphics, 10 multi-colored borders, 10 single-colored borders and 15 fonts.

**GS29- Print Shop GS Library #3**  
This disk contains 72 full-color graphics, 16 fonts, 10 multi-colored borders and 7 patterns.

**GS33- Print Shop GS Fonts**  
This disk contain fonts for use with Print Shop GS. There are over thirty different font styles on this disk and many of the fonts come in several sizes.

**GS35- Print Shop GS Library #4**  
Our largest collection of Print Shop GS graphics that we've ever put on a single disk. Graphics are divided into five categories: People, Animals, Vehicles, Symbols and Misc.

**GS77 - Print Shop IIGS Graphics**  
This disk contains 72 multi-colored graphics. It also contains 15 new borders and 15 new fonts.

**GS78 - Print Shop IIGS Graphics**  
This disk contains 72 multi-colored graphics, 15 borders and 15 fonts.

**GS100 - Print Shop GS Holidays**  
Looking for just the right Santa Claus graphics to dress up your Print Shop GS greeting card. If so, you definitely need this disk which contains over 80 multi-color graphics for Print Shop GS. Each graphic has a holiday theme. There are seven different Santa Claus graphics, Valentines, Easter Bunnies, Thanksgiving turkeys, fireworks, Jack-O-Lanterns, a wreath, angels, and much, much more. Please note: All the graphics on this disk are copyright (c) 1990 by Big Red Computer. They may not be placed in other club's libraries or updated to bulletin board services.

**GS106 - Hodge Podge Print Shop**  
An all-new collection of over eighty multicolor graphics for use with Print Shop GS. All of the graphics are copyright (c) 1991 by Big Red Computer.

**GS123- Animal Print Shop GS**  
An all-new collection of over eighty multicolor graphics for use with Print Shop GS. All of the graphics are of animals. All of the graphics are copyright (c) 1991 by Big Red Computer.

# Sound Utilities

**GS14- Sound Studio**  
This disk contains Sound Studio, a program that allows you to play and manipulate digitized sounds. It also contains a large library of digitized sounds.

**GS63 - HyperStudio Sound Effects**  
Are you looking for just the right sound effect to add into your HyperStudio stack? Do you need the sound of a doorbell ringing, a barking dog or a laser gun? If so then this disk is for you. BRCC member Jim Hirsch put together this collection of sounds in ACER format. The primary source for these sound files were HyperCard resource sounds that Jim converted from the Macintosh. Because they are converted from HyperCard sounds, their size makes them very usable with HyperStudio.

**GS109 - AudioZap†**  
AudioZap is a full-featured sound recording, playback, and editing system for the Apple IIGS computer. A stereo card is recommended for playback, although AudioZap works just fine in mono. For recording, a Sonic Blaster, Audio Animator, or HyperStudio microphone card is required. The program has the capability to load sounds in the following formats: raw data, 8:4 ACE compressed and HyperStudio. It can save the sounds as raw data, 8:4 ACE compressed files, HyperStudio sound files, or as Apple Standard Instrument Format (ASIF) files. ASIF files can be used as instruments for Sound Smith. AudioZap requires Apple IIGS System 5.0 or higher.

# Music

**GS53 - Sound Smith†**  
This disk includes the Sound Smith Program files and 1 sample music file. Sound Smith is a 14 Track sequencer that can be used to create music on an Apple IIGS. The sound quality is superior to any other music program on the market. Sound Smith uses standard ASIF instruments. When instruments are loaded, a piano keyboard is shown, and one can play that instrument by clicking on the piano.

**GS54 - Sound Smith Music Files**  
This disk contains 6 music files for use with Sound Smith. The names of the selections are: Guetto4, Crystal Hammer, Aldabaran, Footloose, File 52. One of the tunes is a file that demonstrates how to use Sound Smith songs with The Music Studio.

**GS55- Sound Smith Music Files**  
This disk contains 6 music files for use with Sound Smith. The names of the selections are: Amegas, Behind, Blizzard, Cambodia, Duggar, End Theme, Garcon, Moments in Love, and S114.

**GS56 - Sound Smith Music Files**  
This disk contains 7 music files for use with Sound Smith. The names are: Axel F, Big in Japan, Forever, Jungle 2, File23, File35, and File42.

**GS57- Sound Smith Music Files**  
This disk contains 8 music files for use with Sound Smith. The names of the selections are: S118, Still, Jigsaw, Blue Monday, Impact, Nothing, Impact6, and Sarcocasher.

**❑ GS66 - Sound Smith Song Disk**  
A number of songs on this disk contain 10 or more instruments and are played back using up to 13 tracks (or voices) simultaneously. All these songs were created by fellow Sound Smith enthusiasts and users. Included are all new songs: Alf, Axel F, Carls Rhythm, Drums, Funkytown, JCD.Magablastar, Song1, Song2, Strange Copter and Yakety Sax.

**❑ GS102 - Sound Smith Carols**  
This disk contains Christmas carols which are compatible with Sound Smith. This disk includes such classics as Deck the Halls, Silent Night and Hark the Herald Angels Sing.

**❑ GS84 - Music Studio Song Disk**  
This disk contains 30 songs for Mediagenic's Music Studio program. Included are songs from Glenn Miller, a Mozart Hom Concerto, movies themes such as "As Time Goes By" and pop classics from the Beatles, Roy Orbison and others. Most songs include lyrics, and are written to take full advantage of Music Studio's capabilities.

## MidiSynth Songs

**❑ SL01- Big Red MidiSynth Jukebox**  
This disk contains everything required to listen to MidiSynth music with just the click of a mouse. Additionally, the Big Red Jukebox provides a way to listen to any MidiSynth songs on other BRCC MidiSynth song disks, or any other MidiSynth songs you acquire. The sounds produced by this remarkable system are really unlike any computer music you've ever heard before. To provide you with an idea of just how great MidiSynth songs are, we're providing a good cross sampling of music on this disk. There's classical selections, including Ravel's Bolero and Pachelbel's Canon In D. There's a selection of popular songs, including Puff the Magic Dragon, Piano Man, Blue Moon, Classical Gas, and the Theme from Goldfinger. For Beatles fans there's Martha My Dear and Let It Be. For rockers, there's a version of The Doors' Riders on the Storm.

Disks SL02-SL05 all require SL01 (BRCC MidiSynth Jukebox) or SynthLAB.

**❑ SL02- MidiSynth Song Disk #2**  
This disk contains 12 musical selections of many familiar popular songs. Included are Africa, Baby Elephant, Day Tripper, Hard to Say, Mork, Nadia Theme, Night Moves, Ommadawn, Misty, Theme from Star Trek: The Next Generation, Take My Breath Away, and When You Wish Upon a Star.

**❑ SL03- MidiSynth Song Disk #3**  
This disk contains 17 eclectic musical selections. Included are Memories, Opus 27, Alone, Theme from E.T., Fugue, Hello, My Girl, Theme from Neverending Story, Theme from Perry Mason,

Rhythm, Call Me Irresponsible, Intro, Vatican Rag, Stairway to Heaven, Theme from Star Trek 4, Traces and Yesterday.

**❑ SL04- MidiSynth Song Disk #4**  
This disk contains 18 more great sounding songs. Included are I'm Not Sure, Beats me, Theme from Bridge Over the River Kwai, Capri, Cheers, Daniel, The Entertainer, Every Breath You Take, I'm Free, In The Air, Largo, Love Story, Moonlight Madness, Nights in White Satin, Nutcracker Suite, El Word, More, and Revolve.

**❑ SL05- MidiSynth Song Disk #5**  
This disk contains 12 more MidiSynth songs. Many are classical selections. Included are Amanda, Minuet, Beethoven's Fifth, Blue Danube Waltz, Scott Joplin Rag, Midsummer, Night Moves, Peanuts Theme, Promenade, Short Demo, Sonata, and The William Tell Overture.

## Miscellaneous

**❑ GS19- Telecommunications**  
This disk contains telecommunication utilities including FreeTermGS, GSVT, a IIGS version of Kermit, several file compression programs, and several other utilities. FreeTermGS utilizes the IIGS desktop. It supports ASCII, Xmodem and Binary II file transfer. The program works with modems that support 300, 1200 or 2400 baud.

**❑ GS36- AppleWorks GS Files**  
This disk contains a collection of templates and sample database files for use with AppleWorks GS.

**❑ GS93 - Telecommunications**  
This disk contains the long-awaited IIGS specific version of ShrinkIt, a program that has become the de facto standard for Apple II file compression. Not only can ShrinkIt extract files created with any Apple file compression techniques, it can also successfully extract files created on Mac, IBM, Atari St, and UNIX systems. The latest version of the 8-bit ShrinkIt program is also on the disk. Other programs on the disk are SnowTerm, Agate, GenericComm and Death Hunt.

**❑ GS94 - Modulæe**  
If you like Apple IIGS music, graphics, and animation, just pop this disk into Slot 5, Drive 1, re-boot your computer with Slot 5 set up as your Startup Slot, fasten your safety belt, and be prepared for a wild and dazzling ride across a 3-dimensional universe created by the French software group known as FTA. Modulæe is an interactive demo of stunning 3-D animation, played to the beat of toe-tapping rock music. As the 30-minute demo progresses, you will see vector balls, free flight, fillmode 3-D, and calculated animation modules. Most modules allow user input, allowed by clicking the switch to take you out of automatic mode.

**❑ GS121- Horoscope GS†**  
This is a desktop program to generate and print birth horoscopes. You enter the date of birth and the longitude and latitude of your place of birth. A horoscope will be drawn which represents astronomical information such as the positions of the planets at the time of birth. Many people believe that a person's character is affected by planet positions and such.

## HyperCard GS Stacks

**❑ HC01- HCGS Starter Stacks**  
There's something for all HyperCard GS users on this disk. Included are a few stacks just for fun, including one that generates random Haiku poetry, and one that generates random philosophical statements. There are a few stacks for children, including a Story Board, a word game, and a math exercise. There are productivity stacks, including one that prints a calendar for any month, a To Do reminder stack, a stack to keep track of your CD collection, stacks to keep track of checking and savings accounts, and one to keep track of inventory. There's even a computerized version of the Briggs-Meyers Personality Type test used by psychologists.

**❑ HC02- HyperTalk Scriptor Tools**  
HyperCard GS includes a built-in powerful programming language, HyperTalk, that allows users, through the use of scripts, to create powerful interactive stacks. This disk will help you as you start to learn about HyperTalk, and will provide you with many routines and tools that you can easily copy into your own stacks. None of these stacks are locked, so you can study the scripts, read about what they accomplish, modify them for your own needs, or just copy them into your stacks. Included on this disk are Animated Icons; ResStation, which allows you to examine resources used in icons, sounds, Xcmds, and cursors; Color Master, a palette manipulation utility; Visual Effects, a library of special effects; Auto-Scripter, a complete set of scripts and routines that you can freely use to spruce up your stacks; BackGround Music, a utility that lets you add music to stacks; DB to Stack, a \$5 shareware utility that imports AppleWorks Data Bases into HCGS; ShowMe, a utility that displays scripting information contained within a stack; and Script Changer, a set of routines that lets you easily modify scripts.

## HyperStudio Stacks

**❑ HS01, HS02, HS03 - Raiders of the Lost Clip Art**  
This 3 disk series of HyperStudio stacks contains Scott and Marty's Excellent Adventure, otherwise known as Raiders of the Lost Art. It is a very well done game stack that contains wonderfully detailed art work and sounds. The first disk contains detailed instructions, background information that explains the game's scenario, as well as information about the authors. Disks 2 and 3 contain the actual Mazes that the player tries to navigate through.

**❑ HS04 - President's Stack†**  
This disk contains biographical information on the presidents from FDR through George Bush. For each president, there is a digitized speech sample, a SHR graphic image, trivia facts and a short biography.

**❑ HS05 - Educational Stacks**  
This disk contains a number of educationally orientated stacks for use with HyperStudio. Included on this disk is a stack about the United States Constitution, the Bill of Rights, the Declaration of Independence, and the Amendments to the Constitution. The complete text of all of those historical documents is included. A shareware American History Stack† is included that traces the US from 1776 to the present. Included is pertinent

information about the states, and their admission to the Union. Maps are included.

Geography† is a shareware stack that supplies information about each of the 50 states. Included are facts about each states nickname, its capital, it's motto, and each states official flower, bird, tree and song. Clicking on any state brings up these facts.

A stack is provided that teaches about the Human Eye. Click on the different parts of the eye and read a detailed explanation about how that part functions.

**□ HS06 - HyperStudio Stacks**

This disk contains 3 very nice stacks. One of the stacks provides for a HyperStudio name and address database; one allows HyperStudio users to keep a digital diary; and one contains a series of brain teaser puzzles. The puzzle stack comes complete with lots of amusing digitized sounds and the puzzles are quite challenging.

**□ HS07 - Guided Tour of the Finder**

This disk contains an extremely informative HyperStudio stack that is a tutorial on using the Apple IIGS's Finder. Written by Ram Rajadhyaksha, this freeware stack provides a point and click guided tour of all of the Finder's options, and provides many hints and tips on using some of the Finder's lesser known features. Each and every pull down menu is explored during the tour, and explanations on each function are provided. Digitized sounds are employed to enhance the learning experience.

**□ HS08 - HyperSpace**

This disk contains 2 wonderful HyperStudio stacks that are educational in nature, and teach about our solar system and man's attempts to explore it.

HyperShuttle, by Jim Hirsch, is an exciting and educational stack that describes in great detail the October, 1989 flight of the Space Shuttle Atlantis, on its mission to deploy the interplanetary probe, Galileo, on its 6 year voyage to Jupiter. The stack contains a digitized sound of the launch of the Space Shuttle, and contains lots of nicely done graphic screens, as well as very detailed textual material that describes all aspects of the Galileo flight. The material is the same as that found on BRCC disk C41, the official NASA Press Packet for STS-34, but is presented in such a way that it is less "cut and dry" than the press packet.

HyperSpace, by Charles Baca, is a tour of our solar system that uses digitized sounds and graphics. One embarks on the grand tour by clicking on graphic representations of the planets. The textual material that describes each planet contains information such as distance from the sun, atmospheric composition, number and name of moons, rotational periods, and geological landmarks.

Screen from HyperSpace on HS08

**□ HS09 - Presidential Stack**

This HyperStudio Presidential Stack was created by Joel Helton, an educator, and proves once again that learning can be fun. Graphics of all the presidents (scanned from either oil paintings or photographs) are presented, and the user can click on any president, and learn a slew of little known facts about each. An excellent example of how HyperStudio can be used in the classroom.

**□ HS10 & HS11 - Williamsburg Tour**

With this two-disk stack, you can visit colonial Williamsburg without leaving the comfort of your own home. By using this stack, you will learn about the historical background of Williamsburg and then you will take a tour of the restored village. Be sure to visit the Bruton Parish Church, the old windmill, and the Guardhouse.

**□ HS12 - HyperNASA: 3/90**

This stack is designed to give you some insight into NASA by giving you a day to day overview of all events of note that occurred during March, 1990. Presented in the format of a calendar, the user clicks on any day, and gets to read all the NASA press releases, status reports and scientific studies released by NASA on that day. March 1990 was an exciting month for NASA. The month started with a Shuttle landing, and ended several days before the launch of the Hubble Space Telescope. In addition to the textual information, digitized sound files and stunning graphics are included.

**□ HS16 - HyperStudio Sampler**

This disk contains a sampling of HyperStudio stacks. It includes a stack which shows you what can be done with animation techniques, a Nerd Test, a stack on music history and finally, a stack on Middle Eastern ancient history.

**□ HS17 - Messerschmidt Stack†**

This is a shareware stack which details the history and markings of the Messerschmitt 109, a World War II German fighter plane. It contains colorful drawings of the airplanes showing their various markings. The stack covers heraldry, markings and the G-6 aircraft.

**□ HS18 & HS19 - Capitol Experience**

This two-disk stack by Duane Gossett is a simulated tour of Washington D.C., with a few twists and turns along the way, just for fun. There are several sound effects, and some neat animations. You'll visit the White House, the Capitol and even the Pentagon. This is a program that students, educators, or anyone interested in history should enjoy. This stack included the HyperStudio run-time module, so that the program does not require the use of the original HyperStudio program.

**□ HS20 & HS21 - Dinosaur Stack†**

This two-disk stack by Larry W. Linson is all about dinosaurs. The dinosaurs are divided into three major groupings: meat eaters, big dinos and plant eaters. Within each grouping, there are several sub-groupings. For each sub-group, the user is shown a chart of the relative size of each dinosaur, a map of where the dinosaurs are believed to have lived, a small amount of textual information on each dinosaur and three or four scanned graphics of dinosaur.

**□ HS25 - Farm Animal Stack**

This stack was developed by the father of a five year

old child who is developmentally disabled. It is appropriate for the age range of 2 to 4. Farm Animals has pictures of common animals and sounds. The stack has been adapted to be used with a Unicorn expanded board / AFC as well as the Touchwindow. This stack requires HyperStudio and 1.5 Megabytes of memory. It will not work on a IIGS unless its memory capacity has been expanded with an additional RAM card.

**□ HS26 & HS27 - Civil War Stack†**

This two-disk HyperStudio stack is a summary of the causes, beginning, major leaders, major battles, and conclusion of the Civil War. The graphics were created with a Quickie scanner, and there are some really good battle sound effects and music. The author of this stack, Duane Gossett, says that it has taken several months of his spare time to plan, organize and create this stack. The HyperStudio run-time module is included. This is a shareware stack.

**□ HS28 & HS29 - Jefferson's Stack†**

This two-disk stack features a simulated trip to Monticello, Thomas Jefferson's Virginia home. Duane Gossett is the author of this stack and he is asking a small shareware fee if you use the program. This stack includes sound effects, scanned graphics and even some animation sequences. There are some real unusual events that happen on your trip to Monticello including a visit to a haunted house. This stack is not only interesting from a historical standpoint, but it's also fun and entertaining.

**□ HS30-HS35 - Star Trek Stack†**

If you love Star Trek: The Next Generation, you're going to love this long awaited 6 disk HyperStudio stack from Scott Everts. It is a virtual encyclopedia of the hit TV show. From the opening chords of the digitized Star Trek theme song to the last entries of shows broadcast during Season 4, everything about this stack is wonderful. Most screens look like the USS Enterprise's computer screens. Detailed information is provided on every show ever aired, every character in every episode, every planet visited, and so much Star Trek trivia is included that you'll learn who wrote and directed each episode, even whose voice is used by the computer. You'll listen as the Enterprise warps out of orbit, listen to people beaming up and down, hear phasers and photon torpedoes, and see scanned photographs of the crew.

# GS Fonts

The following fonts are filetype \$C8 fonts which can be installed on your GS system disk and used with most GS programs like HyperCard GS, AppleWorks GS, HyperStudio, GraphicWriter III, etc. They can also be used on an Apple IIe or IIc with the programs SuperFonts or Publish-It! 3. The printouts shown here are only samples of what is available on each disk. Most of the fonts also come in several different point sizes.

JOIN TODAY!

AMERICA'S #1 USER GROUP

APPLE II SUPPORT

**Big Red Membership:** The Big Red Computer Club is an international user group for Apple IIe, IIc and IIGS computer owners. It was organized in 1981. There are currently over 7,000 members. We have members from all 50 states and over 30 foreign countries. The club is firmly dedicated to the Apple II family of computers and supports only Apple II owners.

In addition to access to our public domain library, members receive many other benefits. As a member of Big Red Computer Club, you will receive a monthly publication called *Scarlett*. Articles include programs, tutorials, educational applications, utilities, reviews and technical tips. It will also include the listing of the latest public domain and shareware disks.

Members can call our technical support hotline during the hours of 9:00 a.m. to 3:00 p.m. Monday through Friday. Our technicians are experienced Apple II users and can answer questions in many areas.

By combining our group's buying power, we offer members special discounts on popular commercial software from companies such as Broderbund, Beagle Bros and Accolade. Members can also purchase ribbons and blank disks at discount prices. And members receive big discounts on Big Red software products such as *Labels, Labels, Labels* and *P.L.U.S.*

**How To Join:** Membership is \$19.95 per year in the United States, Canada or Mexico. Foreign memberships are \$35.95 per year to allow for airmail postage. Payment can be made with cash, U.S. check, money order or VISA/MasterCard. To join, simply mail us your name and address with your payment. Or you can phone in your membership by calling (402) 379-4680.

**Labels, Labels, Labels:** This is our most popular Big Red software product. It allows you to create fancy mailing labels, name tags, and diskette labels in a variety of sizes. You can import Print Shop™ graphics, borders and fonts. There is a built-in database program or you can directly import database files from *AppleWorks™*. *Labels, Labels, Labels* retails for \$39.95. The discounted price for members only is \$24.95. Please use product number PS53 when ordering.

**PS Lover's Utility Set:** This program is designed to be an add-on to the *Print Shop GS™* program. It contains 10 different utility programs that work in conjunction with *Print Shop GS™*. These utilities include the ability to print out a full page catalog of any graphic library disk. *PS Lover's Utility Set* retails for \$39.95. The discounted price for members of the Big Red Computer Club is \$24.95. Please order product number PS51.

## ARKANOID II™

THE REVENGE OF DOH®

**Taito Closeout:** Big Red has purchased the remaining inventory from Taito and has two great game programs for the Apple IIGS. They are *Arkanoid II* and *Qix*. *Arkanoid II* is a fast-paced game which is an advanced version of "Breakout". Use the mouse to move your space shuttle left and right to deflect Energy Balls and destroy barriers that confront you.

*Qix* is an addicting game of territorial control. *Qix* is a deadly computer virus and you must enter it's territory and conquer parts of it for yourself. You're safe from *Qix* in your own territory but watch out for the Sparx and Spritz.

*Arkanoid II* is available from Big Red for only \$15. Order product number TA61. *Qix* is available for \$5 also. Order product number TA60. We also have a IIGS combo package which consists of *Qix*, *Arkanoid II*, and *Renegade* (a karate-type game for the Apple IIe but it works great on the IIGS as well.) Order Product Number TA89 for only \$20.

**Latest System Software:** As a service to our members, we make the latest version of the Apple IIGS System Software available. System 5.0.4 is the current System software. IIGS owners should update to the latest System software in order to maintain capability with new programs and because of the many enhanced features that have been added to the Software. To order the latest System software, use product number SX50 for \$5. You will receive both the IIGS System Disk and the Tools Disk. This offer does not include the System User's Manual which is only available from authorized Apple dealers.
