Quality Computers— Your one-stop Apple II shop

WHO WE ARE

Quality Computers is the largest mail-order company in the Apple II market. We achieved this position by specializing in top-notch service before and after the sale.

CUSTOMER FOR LIFE

Everything we do reflects our policy—Customer For Life. This means we strive to meet your needs so completely that you will stay with Quality Computers.

FREE PUBLICATION

Only Quality Computers gives you Enhance—our free publication designed to give computer-using teachers the kind of information they need to make an impact in their classrooms. Four times a year, Enhance gives you information about Funding Your Classroom, Multimedia, Technical Tips, Product Reviews, New Product Announcements, and more. You also get our complete catalog covering hundreds of products for Mac, Apple and IBM. See page 2 for sign up form.

SALES/SERVICE 1-800-777-3642

Every Quality Computers sales person can answer your questions and advise you on purchases. M-F 9AM to 8PM ET. Sat 10AM-4PM.

TECHNICAL SUPPORT (313) 774-7740

Quality Computers' Technical Support Department is the best in the industry. Having an equipment problem? Can't get that new program to boot? Give us a call. We can answer your questions and give you tips to get you up and running. 10AM to 6:30PM ET

PRODUCT DEVELOPMENT

Because we've been in the computer industry so long, we've come up with some good ideas of our own. We manufacture hardware and software under our own name, plus under the name Q Labs, and Beagle Bros. Some of our products include:

- Q Drive—our own SCSI hard drive that works with Apple II, Mac and IBM.
- Q-RAM—our own line of RAM cards for the

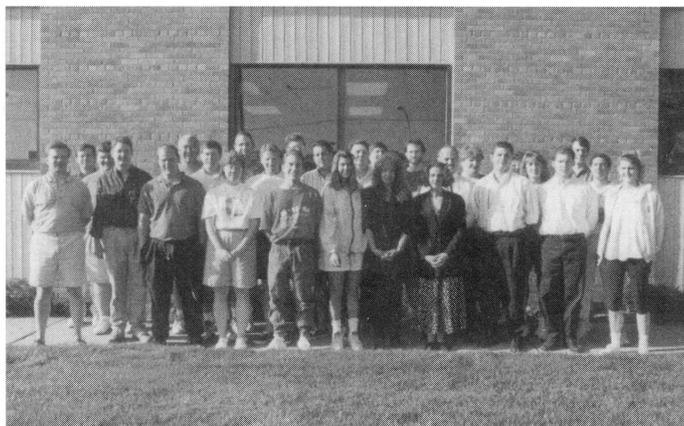

Apple IIe and IIGS.

- Six-Pack—a collection of System 6 desktop utilities.
- EasyDrive, the easy-to-use hard drive manager.
- RepairWorks, the AppleWorks database and word processing file recovery program.
- SuperPatch, the AppleWorks modification and alteration program.
- Signature, the utility that gives your Apple IIGS Mac-like desktop features.
- FlashBoot, the utility that automatically gives your IIGS RAM disk power.
- First-Aid with Reddy, which teaches young children basic first-aid skills.
- TimeOut Grammar, a built-in proofreader for people who use AppleWorks.
- Platinum Paint—one of the finest paint programs ever—for the Apple IIGS.
- Coloring Disks—a collection of delightful drawings that can be colored and enjoyed using Platinum Paint.

FOR THE EDUCATOR

At Quality Computers, we're committed to education. To make computer hardware and software more affordable to schools and teachers, we offer the Teacher Bonus Program. Under this program, teachers and schools earn credit for everything they buy from Quality Computers. These credits are good toward the purchase of any item(s) in Quality Computers' extensive product list. Call today for a sign-up form. You'll be on your way to earning free hardware and software from Quality Computers.

In order to bring you a complete range of educational software, Quality Computers is proud

to be an authorized dealer for the top publishers: Broderbund, MECC, The Learning Company, Weekly Reader, Tom Snyder, Orange Cherry, and Davidson. As an authorized dealer we are able to offer your students' favorite programs in economic School Editions, Lab Packs, Site Licenses and Networks Versions.

WE'RE DOING THINGS RIGHT!

"You guys are simply hard to beat. I couldn't be happier with your service."
— Thomas Haas

"I have taught high school science for 10 years and can honestly say that in all of my dealing with products of any kind, QC is tops."
— Garth Osterday

"I have had dealings with three computer mail-order businesses and yours is, by far, the most professional, helpful, patient, and prompt-to-deliver."
— Nancy Joseph

So give us a try. You will get service that can't be beat, plus Enhance. Or if you don't want to order now, you can still get Enhance. Just call and request your free subscription.

Quality Computers™

Our Policy

PURCHASES

Quality Computers accepts VISA, MasterCard, Discover, American Express, check or money order with no added charges.

School purchase orders are accepted by mail, phone, or FAX at (313) 774-2698.

A 1.5% monthly charge (18% annually) will be applied to all accounts over 30 days past due.

PRICING/PRICE MATCHING

All prices are subject to change without notice. We will meet or beat any nationally advertised price. Price Matching Policy is at manager's discretion. Price matched sales are final and do not qualify for technical support.

SHIPPING

We ship UPS, DHL, Federal Express and U.S. Mail. Saturday deliveries are available. Sorry, no C.O.D. If order is split, we pick up freight on balance of items. See shipping chart on page 64 for UPS charges. Call for all other charges.

RETURNS

REPLACING DEFECTIVE HARDWARE
Should a hardware item require service within 30 days of purchase, we will repair or replace it for you. Simply follow the steps below. The usual in-house processing time is two business days. Please allow for shipping time.

Follow these steps to quickly receive a replacement item.

1. Call Technical Support at (313) 774-7740. We test every hardware item that is returned to us as "defective" and over 60% of them turn out to be OK. By calling Technical Support you will receive the kind of advice and know-how that can prevent needless down time and returns. (Reading the owner's manual doesn't hurt, either).
2. If the item does require replacement, you will be given an RMA#. Return the item to us within 30 days of purchase including the completed and signed Return Form (on back of Packing Slip) and all original packaging in perfect condition. Unfortunately, we cannot replace damaged packaging and manuals.

RETURNING HARDWARE FOR CREDIT
Follow these steps to receive a credit on hardware.

1. Call our Sales Department at 1-800-777-3642 to get an RMA#.
2. Complete and sign the Return Form (on reverse of Packing Slip).

3. Return the product to us within 30 days of purchase including the completed and signed Return Form, and all original packaging in good condition. You will be charged for damaged and missing packaging and manuals.

4. A credit for the remaining balance, minus a 15% restocking fee, will be sent to your credit card company within 1 week following the processing of your return. Please allow 2 billing cycles for the credit to appear on your statement.

5. We cannot refund shipping charges.

REPLACING DEFECTIVE SOFTWARE
Sometimes software disks arrive damaged from the factory. This is usually a result of improper duplication. The result — the software simply does not work.

If you receive defective software, contact the manufacturer for a replacement disk, or if you would like, call us and we will have a new disk sent directly to you.

If you received the the wrong software item, DO NOT OPEN IT! Call us immediately. We will replace it free of charge.

We DO NOT accept software returns for credit.

Follow these steps to return defective software for replacement.

1. Call Technical Support at (313) 774-7740. We test every software item that is returned to us as "defective" and over 85% of them turn out to be OK. By calling Technical Support you will receive the kind of advice and know-how that can prevent needless down time and returns. (Reading the owner's manual doesn't hurt, either). If they cannot help you, you will be issued an RMA#.
2. Complete and sign the Return Form (on reverse of Packing List).
3. Return the damaged disk to us within 30 days of purchase including the completed Return Form (see reverse).

OTHER CHARGES

Manufacturers charge us for damaged and incomplete packaging. We cannot absorb those charges. Therefore, returns to us must include ALL original packaging, manuals, and merchandise IN THEIR ORIGINAL CONDITION. If the packaging or manuals are damaged (i.e. written on, torn, stained, etc.) or missing, we will charge you for our replacement costs. Typically, a manufacturer charges us between \$5-\$8 for a box (some cost more than \$20!). Manuals usually cost us between \$2-\$4 each (some cost \$15-\$20!).

Our hard drive isn't picky about its Apples

PERFECT FOR APPLE IIe AND IIGS COMPUTERS

Thousands of drives later, experts still are praising the Q Drive for its performance and value. *inCider/A+* gave it a four-and-a-half-star rating. Our customers are using words like "amazing" and "fantastic" to describe the way the Q Drive has changed their computing.

Changed their computing? That's right! The Q Drive forever ends tedious disk swapping and slow-opening programs. All your programs can be stored on your Q Drive—all you do is select one and open it. You will be amazed at how much faster your programs open, and how much easier it is to run them. For example, you can run all of AppleWorks, plus the dictionaries without ever having to access your disk drive.

Not only can you store programs in one central location, but also documents. With a Q Drive, you can keep your precious work on the drive and make disk backups as needed. No more mountains of floppy disks to search for and load. You will have your work at your fingertips from the moment you start your computer.

USES THE LATEST QUANTUM ELS SERIES MECHANISMS

The Q Drive features a fast, reliable Quantum mechanism using the latest technology, including auto-parking heads, a voice-coil actuator, and a track buffer. And since the Q Drive uses the industry-standard SCSI interface, you get complete compatibility with your current computer system—and your next, whether it's an Apple II, Macintosh, or IBM.

EASIEST TO USE

The Q Drive's plain-English manual covers more than installation and setup. It even tells you how to manage your mass storage effectively. From GS/OS and ProDOS to backups and maintenance, it's all there, including a glossary of hard drive jargon. And no hard drive is easier to set up and use—install a card, connect two cables, and turn on the power. The Q Drive automatically configures itself to match your computer, and the latest system software is already installed.

LETS YOU SWITCH BETWEEN SYSTEM 5 AND SYSTEM 6!

Are you interested in upgrading to Apple IIGS System 6 but afraid of compatibility problems? Switch Hitter is your solution, allowing you to keep System 5 on your hard drive when you add System 6! A simple keyboard command

selects the desired System version at boot time. Additionally, Switch Hitter lets you change your IIGS's System Speed and Startup Slot at boot time and start up a 3.5" or 5.25" disk, all without having to wait for your hard drive to boot into the Finder.

15 MEG. OF FREE SOFTWARE

The Q Drive comes with 15 MEG. of fantastic, ready-to-run software. A whole collection of games, utilities and graphic programs await you on your Q Drive!

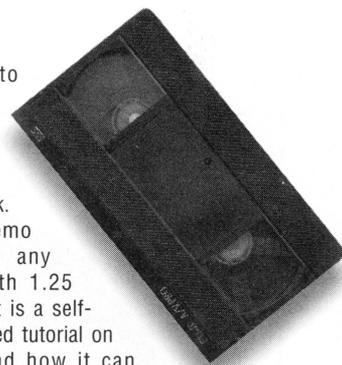

FREE VIDEO!

The Q Drive comes with Quality Computers' exclusive Q Drive Care and Feeding Video. This video gives your easy, step-by-step instructions on everything from installation to the Finder. You will learn how easy it is to install your Q Drive and SCSI card and hook up the cables. You will see how the Q Drive automatically sets itself up for an Apple IIe or IIGS. Plus, you will get an in-depth tutorial on using the Apple IIGS Finder.

The Q Drive Care and Feeding Video is perfect for the new hard drive owner who wants to get started quickly.

If you're not sold on a Q Drive yet, but want to know more, you can order the Care and Feeding Video separately and watch it in the comfort of your own home.

Another way to learn more about the Q Drive is to ask for the Q Drive Demo Disk. The Q Drive Demo Disk runs on any Apple IIGS with 1.25 MEG of RAM. It is a self-running, animated tutorial on the Q Drive and how it can change your computing.

TWO YEAR WARRANTY

And remember, you're dealing with Quality Computers, the hard drive leader. The Q Drive comes with a 30-day money-back guarantee and a two-year limited warranty. If you run into a snag, our technical support staff is available for the cost of a phone call. A great drive and great support, at a great price—that's the Q Drive. Find out why it's the best Apple hard drive value—test drive one today!

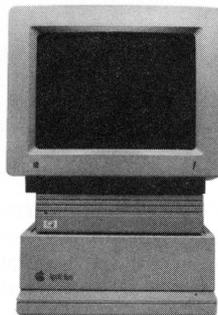

The perfect drive for Apple IIe and IIGS

Apple IIe

The Q Drive automatically formats itself so you don't have to. Just hook it up and it's ready to use. Imagine using AppleWorks without ever swapping disks.

Apple IIGS

Using Switch Hitter, the Q Drive lets you choose System 5 or 6, depending on your needs. Your IIGS will boot faster, and you will never have to swap disks again!

THE Q DRIVE

**The only IIGS
RAM card that
gives you the
power of a
RAM disk...
automatically!**

**FOR VALUE AND POWER YOU
CAN'T BEAT THE Q-RAM GS2**

When we could no longer find reliable, affordable hard drives, we made our own—the Q Drive. The Q Drive made Apples faster and easier to use. In fact, it was such a success that we had to wonder why we'd waited so long. Now we've done it again.

The Q-RAM GS2 is an economical way to add 4 MEG of memory to your Apple IIGS. It's fully compatible with all Apple IIGS hardware and software—including the IIGS RAM Disk and DMA peripherals like the Apple II High Speed SCSI Card.

The 4 MEG Q-RAM GS2 is not only affordable, but comes with FlashBoot free! FlashBoot lets you create a super fast, super convenient RAM disk on your Apple IIGS.

When you install the Q-RAM GS, life becomes just a little easier. Programs load completely into memory at startup, eliminating disk swapping. Out-of-memory error messages disappear. You'll have memory to spare—memory to load desk accessories, or to set up a convenient RAM disk.

The Q-RAM GS2 installs easily, replacing your original 1 MEG. Apple memory board, or any other underachieving memory card you may own. But don't worry about getting stuck with a left over board that you can't use. Ask your sales rep about a RAM card trade-in. It is a terrific way to recycle your old card and save money at the same time!

Of course, since you're dealing with Quality Computers, you get an unconditional 30-day money-back guarantee and a five-year warranty. And the price is the best news of all—a 4 MEG Q-RAM GS2 costs about the same or even less

than other IIGS memory cards in a 1 MEG configuration!

**FLASHBOOT FREE WITH
Q-RAM GS2**

As an added bonus, when you buy a 4 MEG Q-RAM GS2, you get FlashBoot free. FlashBoot lets you quickly save and load the contents of a RAM Disk. What is a RAM Disk? Every Apple IIGS has a built-in RAM Disk capability that lets you reserve some of your computer's memory as a super-fast electronic disk drive. Set up your RAM Disk in the morning and you might not have to swap program disks all day! You can discover the speed and convenience of a RAM Disk with FlashBoot. FlashBoot offers several flexible options to boot the RAM Disk and the other drives attached to your computer, and makes loading your RAM disk easy.

Quality Computers™

Looking for a SIMM board?

If you are looking for a GS memory card that uses SIMMs, we have that, too. The Q-RAM GS has all the same great features as our other memory board, but it uses economical SIMM memory modules. It is perfect for the IIGS user who is thinking about buying a Macintosh. That is because the same SIMM modules used in the Q-RAM GS can be used in a Macintosh. The Q-

RAM GS comes in 1 and 2 MEG configurations as well as 4, just in case you really don't need a full 4 MEG. The Q-RAM GS also comes with FlashBoot free when you buy a 4 MEG board.

Beef up your Apple IIe to 1 MEG for only \$99⁹⁵ and get more from AppleWorks, too!

Snap the Q-RAM IIe into your Apple IIe, and you'll create a whole new computing experience. Programs load completely. A lot less disk swapping. A lot more productivity. All of AppleWorks, plus your TimeOut applications

Now imagine all of this convenience and productivity at a price 1/2 of what other 1 MEG cards for the IIe cost. It's true, the new Q-RAM IIe costs only \$99.95. At this price, the savings can really add up. You can upgrade your IIe lab and save \$100 per computer. Now you can afford more software.

The Q-RAM IIe replaces your IIe's 80 Column Card or Extended 80 Column Card, and is 100% software compatible. The Q-RAM IIe comes with diagnostic software that test the card for peace of mind, and expansion software to boost the performance of AppleWorks.

The Q-RAM IIe is 100% software compatible, and comes with a 5 year warranty. If you're not completely satisfied, return it within 30 days for a full refund.

will completely load into RAM. That means you can concentrate on working—not waiting for disk drives. Plus with a huge 1 MEG treasure trove of RAM, you can create huge documents, and not run into a single "Out of Memory" message.

Imagine students in your school's IIe lab doing more learning and less waiting. Imagine the joy of starting AppleWorks, completing a project, and never having to go back to the disk drive. It can happen with the Q-RAM IIe.

Quality Computers™

1-800-777-3642

Installing Apple II memory is easy. The benefits are fantastic!

How Much Memory Do I Need?

We recommend between 512K and 1 megabyte if you have an Apple IIe, and between 2 and 4 megabytes if you have an Apple IIGS. Power users may need even more memory. In general, though, once you've expanded your memory according to these guidelines, you'll want to consider a hard drive or an accelerator as your next enhancement.

How Hard Is It To Install More Memory?

It's easy! If you don't currently have any expanded memory, you'll just install another card inside your computer. If you've already expanded your memory, you'll install additional memory chips on your current expansion card, or, if it's full, get another card with a larger capacity. In either case, you don't need an engineering degree to install the memory all by yourself. (That's why the top comes off your Apple so easily—it was designed to be user-expandable.) Complete instructions are included with all the memory expansion products we sell.

Why Can't I Just Buy More Memory Chips?

All Apple II models come with a certain amount of built-in memory. (This built-in memory is 64K for the IIe, 128K for the IIc/IIc+, and 256K or 1 megabyte for the IIGS.) None of these computers have any empty sockets for additional memory chips, nor can you replace the existing memory chips with higher-capacity chips. In short, there's no place to put more memory

chips. But you can put a memory card in the computer, and populate it with memory chips. Most cards can be bought in small configurations and expanded later by adding chips. So you can only add memory chips if you already have a memory card in your computer, and only if that memory card isn't already full.

How Do I Know What Chips To Use?

Most cards only accept one type of memory chip—and that depends mostly on the preference of the engineer who designed your card. This information should be in the users manual for your memory card. We sell memory chips for nearly every Apple II memory expansion card.

All memory chips are pretty much the same internally. Only the pin configurations (and the way the memory is addressed) differ. If you're not interested in technical details, read no further, because the water gets deep quickly beyond this simple explanation.

256K memory chips, used on most IIe memory cards, must be installed in banks of eight chips. (For the technically minded, this is because each chip contains 256K bits; to achieve a capacity of 256K bytes, you need eight chips, because there are eight bits in a byte.) 256Kx4 chips, used on the GS-RAM Ultra and the Ram Express II, require only two chips to make a full 256K of memory (because each chip contains four bits worth of the required eight bits of memory).

Similarly, you need eight 1024K (1 megabyte) memory chips to make a megabyte of memory, but you only need two 1024Kx4 chips to make a megabyte, again because each chip contains one or four megabits.

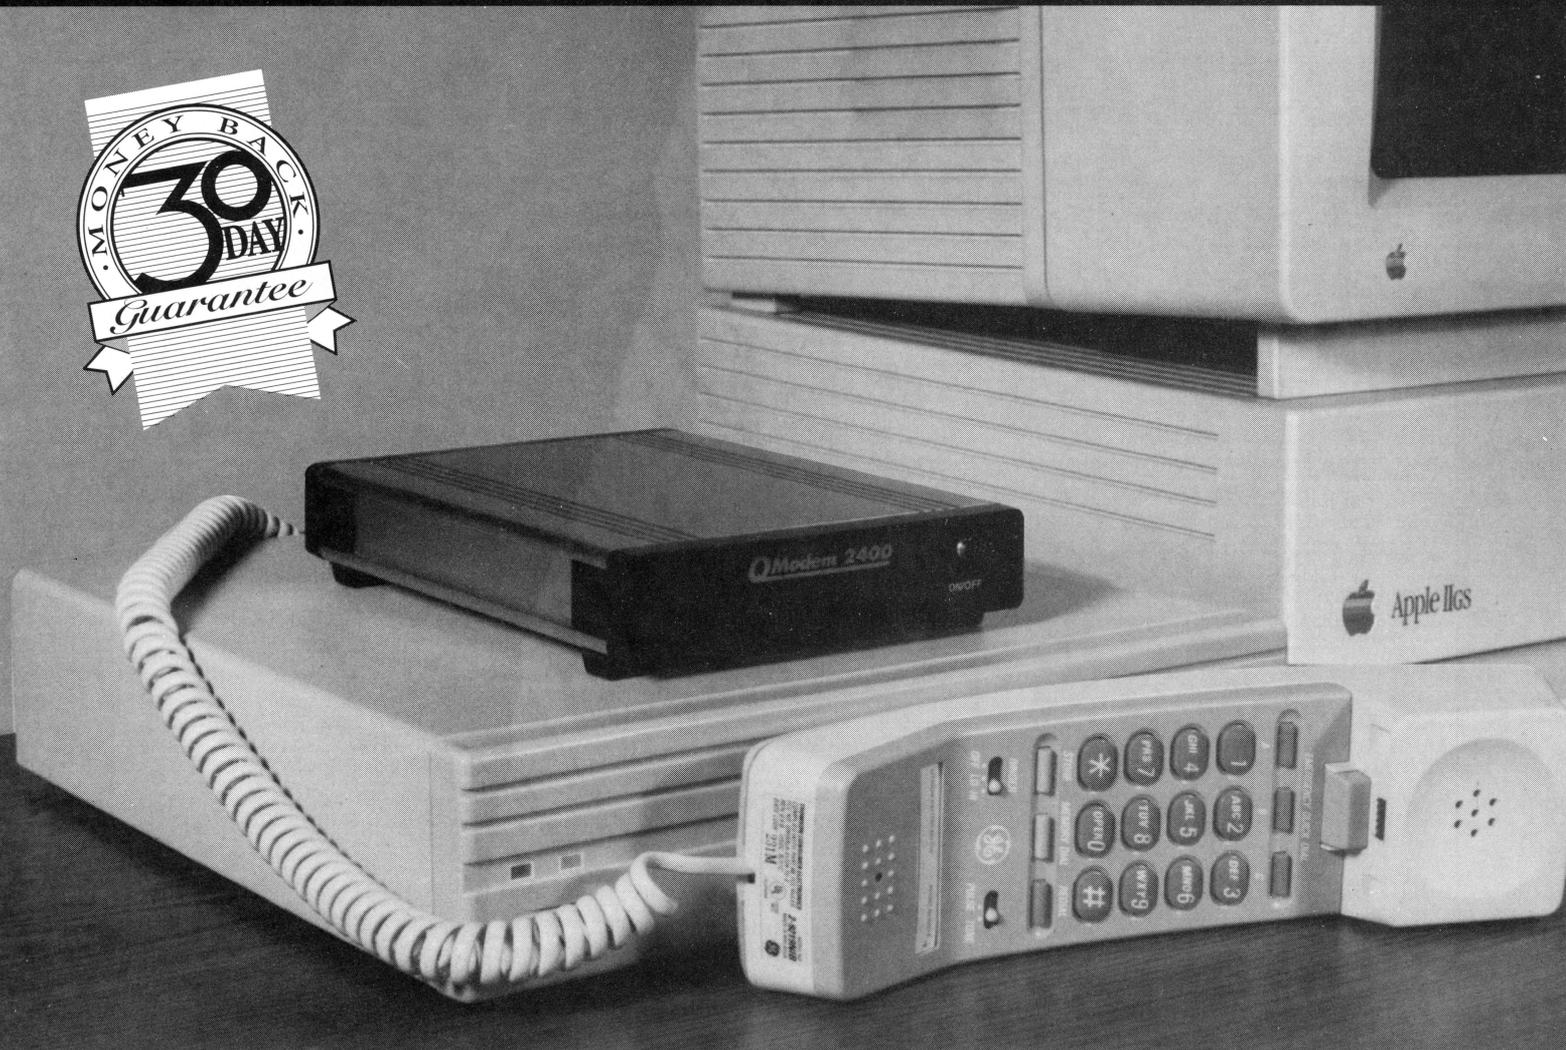

If you've done the math, you know that a 256Kx4 chip contains exactly the same number of bits as a 1024K chip, and that both chips require a total of eight to make a megabyte. The difference is that the 256Kx4 chips are laid out differently internally, so you can add memory two chips at a time instead of being forced to buy a whole megabyte. On the other hand, because of market factors, 256Kx4 chips are more expensive on a per-megabyte basis than standard 1 megabyte chips.

Let the Q-Modem 2400 and your computer link you to the world!

FIND IT ON-LINE!

With a Q-Modem 2400, you can access bulletin boards and computers close to home, across the country, and around the world. You'll find airline schedules, business news, free software, gardening tips, technical help, plus everything in between! Name any topic—you can find it on-line.

IT'S COMPATIBLE!

The Q-Modem 2400 is Hayes compatible and works with virtually any computer. It is compatible with industry-standard, intelligent "AT" commands and all commonly used protocols (including Bell 103/212A, CCIT v.22, and CITT v.22bis). Since the Q-Modem 2400 operates asynchronously at 300, 600, 1200, and 2400 baud, you can communicate at whatever rate you need to. All these features let you use the

Q-Modem 2400 to connect with most modems being used today.

IT'S EASY TO USE!

The Q-Modem 2400 is very easy to use. It features autoanswer and autodial (tone or pulse) for performing phone tasks, and it has a programmable-volume speaker for monitoring call progress. Storing phone numbers and user configurations is also simple because of the modem's programmable nonvolatile memory.

You also get:

- Compatibility with U.S. and international protocols.
- Nonvolatile memory to store your configurations and frequently called numbers
- Auto-Answer AutoDial (tone or pulse)
- Two phone jacks for telephone line and phone
- Adjustable-volume speaker

- Introductory packages for on-line services
- One year warranty

All you'll need to use a Q-Modem is your computer, software, and a cable to connect the modem to your computer.

Quality Computers™

With the Quickie/InWords Combo, all your graphics will look great, and you may never re-type text again

Palette including a lasso tool, eraser tool, fatbits tool (with 2 levels of fatbits and normal image in the corner) and a pencil tool. There is also a Merge Scan menu command, as well as the ability to move a selected section with the arrow keys. You can tile, stack, and name any window. Convert from 640 to 320 and 320 to 640 resolutions automatically.

Think of the showmanship. Using Quickie's three dithered modes, black & white, and simulated grays you produce screen graphics with the highest resolution available. Then you just import them into any Apple IIGS or IIe paint or draw program. Add color and presto! Your graphics come alive with vivid color that captivates and entertains.

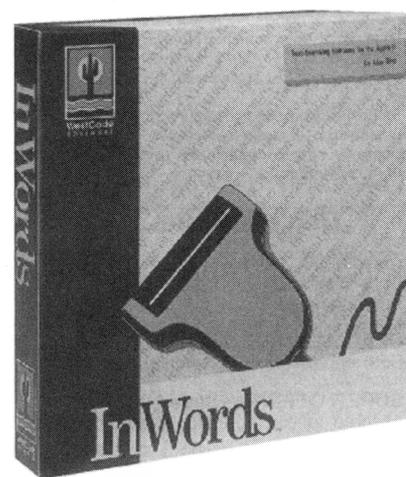

TYPE AT 500 WORDS PER MINUTE WITH INWORDS

InWords provides a revolutionary new way to enter text into your Apple II. Instead of slow tedious typing, InWords will input information at up to 500 words per minute. Simply move your Quickie scanner over a page, then watch as InWords converts the page into usable text for your word processor, data base or spreadsheet without typing a single word.

InWords recognizes characters quickly and accurately, and can recognize any type face. It can read full pages, even if they are wider than the scanner, and isolates columns automatically.

Think of the possibilities. Input lesson plans, contracts, reports, mailing lists,

recipes, research materials, newspaper clippings, magazine articles, and books. All of these and more are just a scan away with InWords.

Quickie/InWords Combo SAVE \$30!

Manufacturer: Vitesse/Westcode #00053..... **\$249⁹⁵**

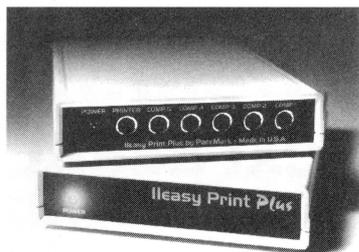

Quickie 3.0 #09015199.95
InWords #5700179.95

Quickie is the scanner that lets you import halftones, line art, graphics, and text (requires InWords) into your Apple IIGS, IIe, II+, or Laser 128.

Quickie scans 400, 300, 200, or 100 DPI (dots per inch) in seconds, not minutes. On a IIGS its real-time display shows you the image as you scan. Double rollers on the scanner head and special audio feedback software ensure accurate tracking.

You can scan from any source with ease—even bound books. And images wider than 4 inches can be scanned in strips, imported and matched on your CRT with most popular paint programs.

Plus, the new Quickie 3.0 GS/OS version offers you more features in the Tool

IIEASY PRINT PLUS

Your computer class is productive-until it's time to print. Then: lined-up students...stone age switches...mixed up pages. Here's a unique, complete and incredibly inexpensive solution to this situation: the Ileasy Print Plus printer-sharing unit. Through engineered excellence, up to five computers automatically access one printer! The price of this amazing productivity tool? Less than one-fifth the cost of more printers!

Great bargains on accessories

SYSTEM SAVER GS—SAVE \$70

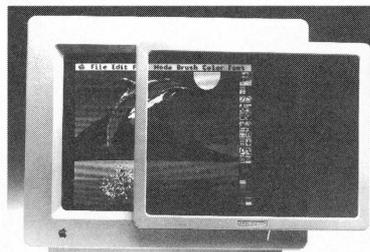

Organize and protect your Apple IIGS or Mac Plus with a Kensington System Saver. It's the best-selling accessory ever made—chosen by more than 1/4 million computer owners. Individual outlets help you organize your peripherals. You control these outlets and your whole system with switches mounted on the front of the System Saver. And System Saver protects your system with surge suppression and noise filtering. It clips dangerous surges and spikes at a safe level and filters out disruptive EMI/RFI line noise. System Saver also help keep your Apple IIGS cool for longer computer life. It's quiet fan draws cool air through the back and bottom vents, over the power supply (the primary source of heat), and out the top vents at the rate of 17 cubic feet per minute.

The power of integrated software for your Apple II and IIGS

THE APPLE II'S MOST POWERFUL PROGRAM—BETTER THAN EVER!

Why do more than 1,000,000 people use AppleWorks? Simple. AppleWorks integrates three powerful applications in one program. It is lightning fast, and easy to learn and use.

In the Word Processor you can communicate your ideas clearly and professionally.

- Achieve greater precision with real tab settings.
- Create professional formats using normal, center, right and full justification.
- Add more impact to your documents with multiline headers and footers.
- Make sure your documents are letter perfect with the 90,000-word dictionary.

The Data Base lets you manage and organize your information quickly and easily.

- Manipulate your data with easy-to-use record selection rules.
- Sort up to three categories at one time.
- Create 2 or more labels across a page.
- Use totals, subtotals, and calculated categories to add more detail to your reports.

In the Spreadsheet, perform complex or repetitive calculations in seconds.

- Choose from more than 40 powerful functions, including arithmetic, financial, logical, and trigonometric functions.
- Copy or move blocks of information directly to Word Processor or Data Base.
- Create look-up tables referencing both values and labels.
- Sort your information for quick data analysis.

You also get a Mail Merge function that lets you combine Data Base information with your Word Processing documents to produce customized letters or reports. Plus, by using some handy AppleWorks add-ons, like the TimeOut Series, you can make AppleWorks even more powerful.

APPLEWORKS GS—6 PROGRAMS IN 1!

AppleWorks GS delivers six of the most powerful and popular Apple IIGS software applications—word processor, spreadsheet, data base, page layout, graphics, and communications—in one easy-to-use program. Its Macintosh-like interface means all six applications have the same look and feel, so you spend your time being productive instead of learning a new program. The applications work so well together that sharing data is as easy as a click of the mouse, so you'll get your work done faster.

AppleWorks GS does what you do. Use the word processor to zip off a quick note or crank out a 50-page term paper, The Data Base puts information at your fingertips—whether you're

keeping track of baseball statistics, inventory, or addresses. Printing mailing labels directly, or combine the word processor's base to send personalized form letters easily.

Number crunching—for tracking budgets, calculating taxes, analyzing personal finances, or figuring complex scientific or math problems—is fast and easy with the AppleWorks GS spreadsheet. And the graphics application can spice up anything from homework to greeting cards to sales reports with bold, colorful illustrations.

Put it all together with real desktop publishing in the AppleWorks GS page layout application. Combine analysis from a spreadsheet with color charts and clip art from the graphics application for powerful presentations. Or write stories in the word processor, drop in a table of numbers from the spreadsheet, get pictures from a data base, illustrate with the graphics program, and use page layout to combine it all for a school or community newsletter.

Become an AppleWorks power user with powerful TimeOut programs

TIMEOUT REPORTWRITER

If you've ever had data in two or more files and wished you could create a single report from them, ReportWriter is the solution. You can combine information from several files into a printer-ready report, or with ReportWriter's posting feature, you can create a new database or spreadsheet. Using ReportWriter's editor you can place data fields and text anywhere you like. ReportWriter scrolls sideways to accommodate reports on wide paper, up to 240 columns.

DYNAMIC DUO
AppleWorks & TimeOut
The TimeOut series of software transforms AppleWorks into a more flexible and powerful program. It lets you use AppleWorks like you always do. You won't notice anything different until you call up a TimeOut application. When you're finished, it's back to work with AppleWorks, without ever skipping a beat. With TimeOut, you never leave AppleWorks

If you write in AppleWorks, then you need these valuable tools

TIMEOUT GRAMMAR

Remember when spelling checkers were considered inconvenient? Well... they were inconvenient. But now, all word processors, including AppleWorks, have built-in spelling checkers, and everyone uses them. It's the same with grammar checkers. Until now. New TimeOut Grammar adds built-in grammar checking to your AppleWorks 3.0 word processing. With TimeOut Grammar, you have the power to guard against embarrassing errors. No matter what you write, from a high-school paper to an annual report, TimeOut Grammar will make it stronger, clearer, and more concise. It's like having an English teacher inside your computer!

TimeOut Grammar is easy to use. When it detects a writing error, such as a noun-verb disagreement, it highlights the offending phrase, explains the error, and suggests a better way to say the same thing. You have the option to accept the suggestion, ignore it, or you may rewrite the phrase in a different way. It's your writing, and your style—only better and more readable.

When you're done checking your writing, TimeOut Grammar automatically saves the changes so that your document comes out polished and ready to be printed. Requires AppleWorks 3.0.

BEAGLEWRITE GS

BeagleWrite GS is the closest thing to Mac software you can run on an Apple IIGS—a world class word processor in the Macintosh tradition. Pull-down menus and intuitive mouse con-

trol make BeagleWrite GS the most elegant, effortless way there is to get your words into print. And do it beautifully—with Macintosh fonts in a rainbow of sizes and colors.

You'll love the speed and efficiency of "What You See Is What You Get" word processing. Your print outs are just as eye-catching as the screen. BeagleWrite GS has the highest standard of printing possible—in 16 colors on the ImageWriter and neat type-set quality on the LaserWriter.

BeagleWrite GS lets you draw lines, ovals and rectangles, too. Graphics can be placed anywhere in a document. You can reshape, and trim pictures to fit perfectly with your text. And it's compatible with all major Apple IIGS graphics programs.

BeagleWrite GS comes with an 80,000-word spell checker that offers suggestions based on spelling and pronunciation. The on-line thesaurus has over 450,000 synonyms—making it the artistic tool for serious writers!

Quality Computers™

Superior Paint & Draw Software for the Apple IIGS

PLATINUM PAINT 2.0

New Platinum Paint 2.0 finishes first when it comes to Apple IIGS paint programs. It includes graphic editing features that are easy to use and incredibly fast. Compose lifelike paintings, make signs or color illustrations, import clip art from many sources, colorize scanned images, and more.

Platinum Paint 2.0 gives you even more power and ability.

- No longer is your creativity limited to the size of your screen. Now you can create and print masterpieces of virtually any size.
- With Platinum Paint 2.0 you can create and play animations.
- You can add sounds to your creations. Imagine painting a picture of a bird, clicking on the bird's beak and hearing it chirp.
- Platinum Paint 2.0 is easier to use thanks to its new hierarchical menus.
- Just in case you make a mistake, or just change your mind, Platinum Paint now support a full-size undo.
- You can get super detailed because Platinum Paint 2.0 supports fatbit magnification.
- You can work in pixel measurement if you want, or change to something more familiar—like inches!
- Platinum Paint 2.0 includes a special Junior Version that makes using the program easier for them and safer for you. This special feature hides the menu bar from young artists, protecting your valuable files from unfortunate accidents.

And of course, Platinum Paint retains all of the original features of the previous version.

BEAGLEDRAW

Get professional graphics tools with BeagleDraw—the leading draw program for the IIGS. BeagleDraw gives you all the power of the Macintosh interface for sophisticated graphics development.

BeagleDraw's object-oriented design sets it apart from paint programs. The advantage of

BeagleDraw is precision. First, you can create an object—make it any size, color and shape you like. Then use the mouse to move the object where you want it on the screen.

Objects can be resized and reshaped at any time. You can even duplicate, flip and rotate objects. Plus, object-oriented graphics print out far better than graphics printed with paint programs. ImageWriter II printing is super sharp, even in color.

Pointless and QC's TrueType Font packs will give your IIGS a lifetime of smooth crisp fonts

SPECIAL

Pointless brings the clean, crisp look of TrueType font technology to your Apple IIGS

You've seen them before, those unsightly "jaggies" that make your text look a little rough around the edges. Well, it's time to clear things up, with Pointless, the newest font technology for the Apple IIGS.

With Pointless, letters displayed on the screen appear smooth, crisp and clear at even the largest point sizes. What's more, Pointless improves printed output with almost any kind of printer, including the ImageWriter and DeskJet.

To make all this possible, Pointless uses TrueType outline fonts, the new font standard on the Macintosh and Windows. Now GS users can share the benefits of this new font technology.

A snap to install, Pointless works transparently with any IIGS program, including favorites like AppleWorks GS, Hyper-Studio and Platinum Paint. Simply pull down the Font menu and your TrueType fonts show up along with your other GS fonts. But unlike regular GS fonts, Pointless will create any point size you need from a single TrueType font in seconds.

To help you design great-looking pages immediately, a variety of popular TrueType fonts are included with Pointless. Pointless requires and Apple IIGS using GS/OS 5.0 or later. Appropriate printer drivers required.

Now you Pointless users have ninety-two more TrueType fonts to choose from. We've assembled an impeccable collection of the world's best typefaces—in a wide variety of styles—into three different type libraries. QC TrueType Font Packs give you the power to be your creative best.

SPECIAL

Apple IIGS System 6 Bundle

- The Finder can be set to avoid grinding your 5.25" drives.
- When the computer asks you to insert a disk it needs, you no longer have to hit Return—the computer detects it automatically.
- The screen no longer switches to text mode and back to graphics when launching some Desktop programs.
- New music tools and applications to allow new programs to sound even better.
- Media-control toolset and desk accessory to allow easier integration of video with your multimedia presentations.
- Universal Access features for physically handicapped users.
- More tools for programmers to write great programs. Like drivers for Apple flat-bed scanners and SCSI tape drives.
- Simpler and faster hard drive installation.
- Great documentation.

- **DA's.** Just to give you more to choose from, we're giving you several handy desk accessories including: Calendar, enhanced Calculator, Scrapbook, Games, and more.
- **Fonts.** Using the same font for everything is very uncool, so our Bonus Pack includes over 30 display and text fonts.
- **FlashBoot.** What is faster than a speeding disk drive? A RAM disk. FlashBoot lets you automatically set up a super-fast, super-convenient RAM disk.
- **The Apple II Enhancement Guide.** This handy little book is packed with information to help you upgrade your Apple II. It covers RAM, hard drives, accelerators, the Finder, and more.
- **Icons.** Over 50 fun, useful icons.
- **The System 6 Video.** Learn how to get the most from System 6 and the QC Bonus Pack. This video covers all aspects of System 6 and is easy to understand.

System 6 is power. System 6 is speed. System 6 is a must for all Apple IIGS owners. It includes:

- StyleWriter printer support. Now you can use Apple's low-cost inkjet printer with any Apple IIGS Desktop program.
- Macintosh, Apple DOS 3.3, and Apple Pascal disk support—great for converting your files!
- A completely redesigned Finder—faster, friendlier, and more powerful than ever before.

QC SYSTEM 6 BONUS PACK

Leave it to Quality Computers to take something good like System 6 and make it great. We looked at the list of System 6 features and asked ourselves, "Self, what would make System 6 even better?" Here's the answer:

- **Clip Art.** We're throwing in over 100 beautiful clip art images, perfect for desktop publishing or multimedia applications.
- **Clip Sounds.** We're also including over 50 digitized sound files. Some are classics while some are the newest on the market. They go great in HyperStudio and other sound programs, or you can have music playing in the background while you work.

Signature and Six Pack prove that utility programs don't have to be boring!

SIGNATURE GS

Is your IIGS just plain vanilla? Now you can make it any flavor you want — with Signature GS, Q Lab's set of Control Panel Devices that will let you create a computing environment that is uniquely your own. With Signature GS you get:

PHANTASM

A utility that prolongs screen life — and looks good doing it. When your screen has been still too long, it can become damaged. Phantasm prevents damage by automatically giving your screen something to do. A variety of fun, attractive screen activities are available, including Magic Molecules and Slimy Slugs. Plus, you control when Phantasm comes on and goes off.

GRAFFITI

There's nothing wrong with the IIGS desktop — except it's boring. Graffiti gives you a variety of colorful desktop patterns to choose from — or you can create your own with the built-in desktop painter.

SONICS

The "S" in IIGS stands for sound. Sonics lets you customize your IIGS sounds, and assign special sounds for specific functions. And these aren't just beeps — they're fun and entertaining. Imagine your IIGS actually "belching" out a floppy disk. Sonics is easy to use and change, so you can add or change sounds on a whim.

BOOT-MASTER

Changing the configuration of all your IIGS's drivers, and system elements can be a pain. But BOOT-MASTER makes it easy by putting the controls for all your IIGS's drivers, CDAs and NDAs on one master control panel. You turn them on and off at will — and change your selections easily.

\$29⁹⁵

SIX PACK

Six Pack, the first collection of System 6 Finder Extensions, lets you add new features to System 6. Just click the icons you want to work with, then select the Six Pack functions you want to perform from the Extras menu. With Six Pack you get:

- MoreInfo—lets you find out more about your files, including their actual type and auxiliary type, access information, and more. You can even change all that information if you want.
- AlarmClock—the most compatible menu bar clock. It displays the time in a window or at the right of the menu bar. Plus, it will alert you for important occasions.
- SuperDataPath—remembers a default data directory for your programs so you don't

have to change folders every time you launch an application.

- HotKeys—Add dozens of functions to your function keys (on an extended keyboard) or to your numeric keypad.
- CDEV Alias—Add any frequently-used Control Panel function (CDEV) directly to the Apple menu, saving you the stop of opening the Control Panel first!
- CPU Use & Memory Use—Shows visually how much of your computer's resources are being used at any one time.
- SelectIcons—Select icons in the front window based on partial filename, filetype, modification date and more!
- PrintCatalog—Print an old-style directory listing on your printer, including filename, filetype, and more.
- Encrypt—Save you data from prying eyes!
- FilePeeker—Preview the contents of graphics, text, and sound files—and more— without having to launch a separate application!
- WorkSet—remembers a group of files and opens them all at once.
- FileCompare—Check seemingly identical files for differences you might have missed comparing them visually.

Quality Computers™

PROGRAM WRITER

Program Writer replaces Applesoft's basic line editor with a full screen text editor that functions like AppleWorks. Move the cursor around the screen and make changes in your program anywhere you want to. There's no need to continually re-list the file and trace over lines. Just use the arrow keys to scroll up or down to where you want to edit. Or use the mouse!

Manufacturer: Beagle Bros
(Shipping Wt: 1)
#52038.....32.95

BEAGLE COMPILER

The secret to blazing Basic is Beagle Compiler. There are no more sluggish text screens or crawling graphics. You get the same blistering program speeds as the experts. Programming with Beagle Compiler is exactly the same, only faster. Just type RUN and your Basic program blasts off! All Applesoft and ProDOS commands are supported, so you don't have to modify your existing programs.

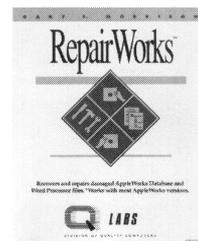

Manufacturer: Beagle Bros
(Shipping Wt: 1)
#53012.....49.95

SUPERPATCH

SuperPatch, the world's most comprehensive customization program for AppleWorks installs and de-installs over 150 patches on version 3.0, 2.1, and 2.0. Patching with SuperPatch is simple, bullet-proof and lots of fun. Create personalized screen displays and customize cursors. Change the error buzz or eliminate it. Add a working clock to all screens. Date stamp your database and spreadsheet reports automatically, and more!

Manufacturer: Q Labs
(Shipping Wt: 1)
#5404234.95

REPAIRWORKS

RepairWorks recovers and repairs AppleWorks database and word processing files that have bad blocks or corrupted data. You know, those "Getting Errors Trying to Read" messages that are a portent of doom for all AppleWorks users. RepairWorks does not repair disks with damaged directories. All you need is an Apple IIe, IIc, or IIGS computer, 128K of RAM and 2 disk drives. A printer is recommended.

Manufacturer: Beagle Bros
(Shipping Wt: 1)
#54043.....34.95

SUPERCONVERT

SuperConvert converts graphics from Apple II's, Macs, IBM, Atari ST, Amiga, Commodore and electronic formats like GIF into Apple IIGS.

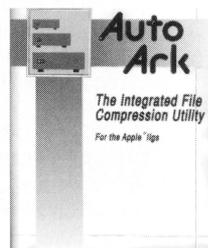

Manufacturer: Seven Hills
(Shipping Wt: 1)
#52006.....27.95

KANGAROO

Kangaroo adds itself into any OPEN or SAVE dialog box, letting you quickly hop from one folder to another. It automatically remembers the recently used files and folders to make accessing them a snap. Kangaroo requires an Apple IIGS with 1 MEG, one 3.5" disk drive, and System 5.0.4 or later.

Manufacturer: Seven Hills
(Shipping Wt: 1)
#52097.....32.95

AUTO ARK

Auto Ark compresses and decompresses files 'on the fly', effectively doubling the storage capacity of your Apple IIGS hard disk drive. Auto Ark combines a finder extension and desk accessory letting you compress and expand documents 'on the fly'. Double-click a compressed application from Finder™ and watch it expand and execute automatically!

Manufacturer: Econ
(Shipping Wt: 1)
#52301.....27.95

BAKKUP 2.0

A Quality Computers Exclusive! Bakkup 2.0 boasts a number of new features including: support for SCSI tape backup drives; support for 3.5" low and high-density disk drives; option compression that reduces the number of disks required by as much as 60%; verify/write always on unformatted disks; category on each disk; find next disk; and much more! Requires an Apple IIGS with hard drive and 1.5 MEG of RAM.

Manufacturer: Vitesse
(Shipping Wt: 1)
#52030.....44.95

Learning to program your Apple II GS is fun and easy!

TOOLBOX PROGRAMMING

Don't let the toolbox intimidate you any longer. Toolbox Programming is your personal guide into the exciting world of Apple II GS toolbox programming! The self-paced course comes with a 460 page manual and 4 disks filled with toolbox source codes! This includes solutions to every problem given in the book and complete source code to every program. You will complete your own text editor, a music synthesizer, scrapbook, NDA and much more!

Manufacturer: Byte Works
 (Shipping Wt: 2)
 Toolbox Pascal #5302174.95
 Toolbox C #5302374.95

ORCA/M 2.0

The 2.0 version of ORCA/M includes many new features and support for Apple's latest operating system. ORCA/M continues to be the standard development environment for assembly language programming on the II GS.

Manufacturer: Byte Works
 (Shipping Wt: 1)
 #5300669.95

ORCA/C LEARN TO PROGRAM BUNDLE

This tutorial course is designed to teach you to program in C at the pace you set. The course materials include 17 lessons complete with screen shots, side bars, and more. It is bundled with the ORCA/C compiler, so you get everything you need in one package. (II GS)

Manufacturer: Byte Works
 (Shipping Wt: 2)

 #5300529.95

Get control of your printer

EXPRESS

Express is a printer spooler that lets you use your IIGS while you print! No more waiting until your printer finishes. Multiple files can be spooled, printed more than once, and deleted from the spool list. Express works with GS/OS compatible software like AppleWorks GS, GraphicWriter III, Platinum Paint, and others.

Manufacturer: Seven Hills
 (Shipping Wt: 1)
 System Requirements: Hard Drive
 #52014.....32.95

HARMONIE

Harmonie is a set of printer drivers that can unleash the power of your IIGS for top-quality (300dpi) text and graphics printing. It allows standard GS/OS applications to print with the Hewlett-Packard LaserJet II & III, DeskJet & DeskJet Plus, PaintJet, and any other laser or ink jet printers that meet HP specifications.

Manufacturer: Vitesse
 (Shipping Wt: 1)
 #52013.....34.95

PERFECTIMAGE

PerfectImage replaces your IIGS's standard ImageWriter driver to provide better color and grayscale graphics printing. The same driver as in the Harmonie driver package, PerfectImage is ideal for ImageWriter owners who want better print quality without upgrading their printer.

Manufacturer: Vitesse
 (Shipping Wt: 1)
 #52008.....19.95

TRIPLE-DUMP

Get control of your printer with Triple-Dump! Load your picture into Triple-Dump. Trim, Rotate, reverse, magnify or enlarge it. Then print — in any one of the many print qualities Triple-Dump offers. You can create hard copies of all the standard Apple II graphics formats—Lo-Res, Hi-Res and Double Hi-Res graphics, as well as 40 and 80 column text screens.

Manufacturer: Beagle Bros
 (Shipping Wt: 1)
 #52039.....29.95

Powerful Apple II disk utilities

EASYDRIVE

EasyDrive automatically installs your programs on your Apple compatible hard drive, so you can choose the applications you want from the EasyDrive menu. Running, removing, backing up and restoring, indexing, copying, moving files, and dozens of other functions are performed on screen.

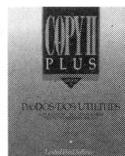

Manufacturer: Q Labs
 (Shipping Wt: 1)
 #52049.....39.95

SALVATION SUPREME

Salvation Supreme gives you five Apple IIGS hard drive utilities in one package. With Salvation Supreme you can repair damaged files (Deliverance), optimize your drive (Renaissance), cure viruses (Exorciser), back up (Bakcup), and manage your hard drive in dozens of ways (Wings). The five modules can also be purchased separately (except for Wings).

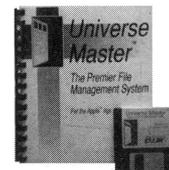

Manufacturer: Vitesse
 (Shipping Wt: 1)
 #52032.....89.95

COPY II PLUS

Copy II Plus gives you over 20 built-in utilities for the Apple II including a backup program for copy protected disks. Utilities include: delete and undelete files, map disk usage, view and print files, format and verify disks, and catalog. Check and adjust drive speed with the built-in drive diagnostics.

Manufacturer: Central Point
 (Shipping Wt: 2)
 #52033.....34.95

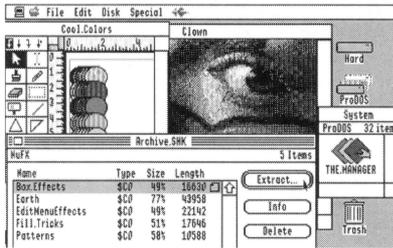

UNIVERSE MASTER

Universe Master, is the first Apple IIGS utility that integrates all of the disk management capabilities you will ever need into a single application. It conforms to the Apple Human Interface Guidelines making each function simple and intuitive to use. Universe Master requires and Apple IIGS with System 6.0, 1.5mb RAM and a hard disk drive.

Manufacturer: Econ

 #52300.....89.95

A MultiFinder for your Apple IIGS

NEW!

THE MANAGER

IIGS users can now benefit from the same technology that Macintosh users enjoy—The Manager is the first (and only) true MultiFinder™ for your Apple IIGS! Multiple applications can be open simultaneously and moving among them is as simple as clicking in a different window. This is a tremendous time saver because you don't have to quit one application to start using another, which is especially convenient when copying and pasting between applications.

Use The Manager to create your own integrated environment...just open your favorite IIGS-specific word processing, painting, DTP, telecom and other programs, then instantly move among them! It is fully compatible with AppleWorks GS, GraphicWriter III, Platinum Paint, Teach, Express, Kangaroo, TransProg III, and others.

Manufacturer: Seven Hills
 System Requirements: 2MB, System 6, 4MB recommended, hard drive recommended
 (Shipping Wt: 1)
 #39453 **\$49⁹⁵**

TRANSPROG III

TransProg III, by Seven Hills Software, is a time-saving program launcher. After installation the TransProg III icon appears at the end of every standard menu bar. From then on, instead of quitting to the Finder each time you want to start a different application, just select the application from the TransProg III menu. The currently-running program is automatically "quit" and the application you selected is immediately launched (completely bypassing the Finder).

The TransProg III menu is fully customizable and also includes a "Thermo Configuration" option. Using that option you can define hotkeys for applications. Simply press a letter you've chosen and that application is launched immediately, bypassing your usual Start application.

Manufacturer: Seven Hills
 System Requirements: IIGS with System 5.04 or later
 (Shipping Wt: 1)
 #39444 **\$27⁹⁵**

Your Apple IIGS is a fantastic multimedia machine!

HYPERSTUDIO

HyperStudio lets you create your own multimedia applications, and provides everything you need in one complete package. HyperStudio can integrate super hi-res graphics, text, and digitized sound files.

HyperStudio is a complete system, and includes a no-slot sound digitizing card and a microphone. This means you can add your own voice or sound effect to your applications right while you're creating them.

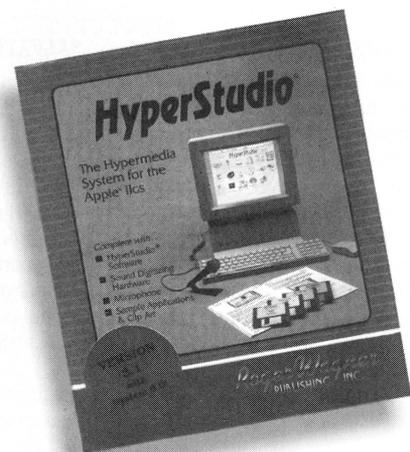

HyperStudio also includes the Sound Shop digitizing software to record, edit and save your own sound samples, and the Sight 'n Sound utility that lets you set up a disk to bring a super hi-res picture or sound file while a disk is starting up.

HyperStudio can also control videodisc players, linking specific video images or sequences to any given card in the stack. Both still and play sequences can be selected with a remote-con-

trol-like display. When combines with the Apple II Video Overlay Card, video images can be put right on the computer screen as part of a card.

HyperStudio includes example stacks, sound samples, and over 250 clip art images.

Manufacturer: Roger Wagner
 (Shipping Wt: 1)
 System Requirements: Apple IIGS with 1.25 MEG RAM and a 3.5" disk drive (hard drive recommended.)

The Playroom & Treehouse—where children love to learn

THE PLAYROOM

- **Grade Level:** Preschool to 2nd
- **System Req.:** 128K

The Playroom is a delightful, child-sized world filled with games, toys, surprises and learning experiences. It's ideal for children from pre-kindergarten to second grade and even beyond.

Exploring The Playroom, children can't help but start learning about numbers, letters and time. They also begin to develop thinking and computer skills. The Program covers a wide variety of subjects: early math, reading readiness, telling time, beginning keyboarding, art and creativity, logical thinking and spelling. Plus several additional activities that are just for fun.

This award winning program was designed by early-childhood specialists and extensively field tested in preschools and homes.

THE TREEHOUSE

- **Grade Level:** Kindergarten to 4th
- **System Req.:** 128K, mouse or joystick, Apple IIe must be enhanced

The Treehouse, like The Playroom, encourages exploration and creativity. Seven captivating games help children discover the fascination of music, science, math and language arts... with lots of surprises that are just plain fun! And children love getting to know the Awesome Possums—on-screen playmates with unique personalities.

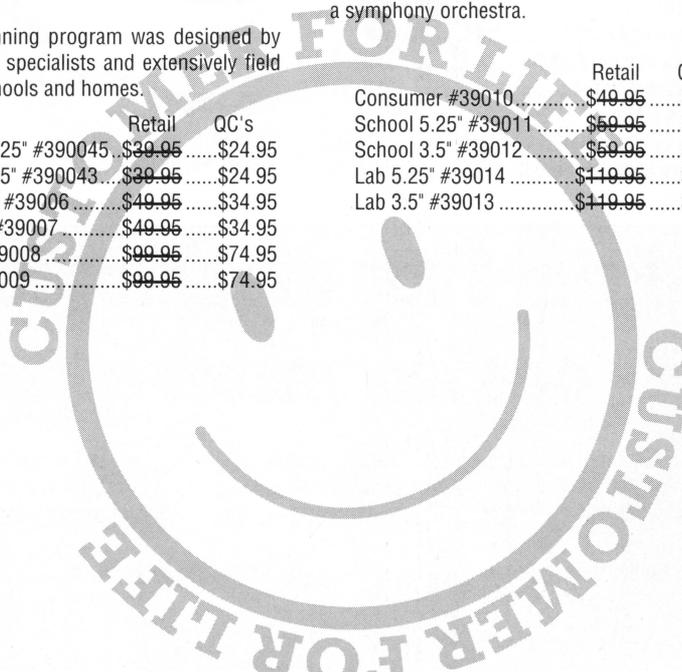

The Treehouse includes a lively cassette featuring a delightful sing-and-dance-along version of The Treehouse theme song, plus a "rap tour" of a symphony orchestra.

Go globe trotting with Carmen and her gang

WHERE IN TIME IS CARMEN SANDIEGO?

- **Grade Level:** 5th and Up
- **System Req.:** 128K

Carmen is up to her old tricks again. But this time she and her gang have their hands on a time machine and they're traveling back through time to wreak all kinds of havoc. In the process, students learn facts about the history of the world from 400 AD to the 1950's. Carmen and her gang hide out in the Middle Ages, the Renaissance, the Industrial Revolution and the Modern Age. This program also exposes students to a wide range of world cultures, as Carmen and her gang journey back in time to India, China, Japan, Mexico, Peru and Europe.

- **Grade Level:** 6th to 12th
- **System Req.:** 128K

Give your students an exciting slant on U.S. history with Carmen Sandiego's latest adventure. Where in America's Past comes with "What Happened When," a 1300-page encyclopedia of American culture and history. Over 1200 clues contain fascinating information about fashion, folk ways, philosophy and religion, science, the arts, sports and a wide range of other topics. Gameplay is highly challenging with 45 destinations available at any time, covering 5 regions of the U.S. and 9 time periods (from 986 AD to the present).

WHERE IN THE USA IS CARMEN SANDIEGO?

- **Grade Level:** 5th and Up
- **System Reqs.:** 128K
- **Manufacturer:** Broderbund

Sharpen your students' problem solving skills and knowledge of geography as they chase Carmen through all 50 states plus the District of Columbia. This time, Carmen and her gang are out to steal our most precious national treasures! Students decipher clues relating to U.S. and state history, geography, economy and culture. Over 1500 clues encourage students to take notes, develop analytical skills and look up answers using Fodor's USA Travel Guide (included).

WHERE IN THE WORLD IS CARMEN SANDIEGO?

- **Grade Level:** 5th and Up
- **System Reqs.:** 128K; Apple IIGS—512K
- **Manufacturer:** Broderbund

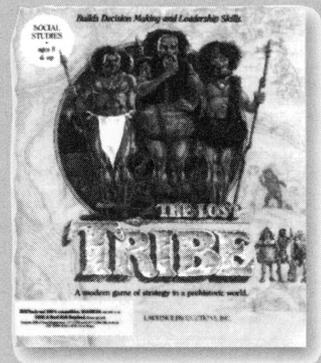

Students must track down and capture desperadoes who are out to steal every priceless treasure and landmark they can find. Your students decipher clues using their Crime Computer and 1,000 page World Almanac (included). As they explore 30 great cities of the world, over 1,000 clues about national flags, currency, history, and geography will guide them on their way.

THE LOST TRIBE

- **Grade Level:** 2nd and Up
- **System Req.:** Apple IIGS—1 MEG, System 5.04+, 3.5" drive; 2-3.5" drives or 2-MEG or hard disk recommended
- **Manufacturer:** Lawrence Productions

The Lost Tribe, by Lawrence Productions, is a unique strategy game set in prehistoric times that motivates children to build decision making and leadership skills. As leader of the Lost Tribe, you lead a group of homeless, prehistoric people away from an erupting volcano to a safe place in a distant land. Taking risks, thinking strategically, and making good decisions are all part of the learning adventure. Choose from six challenging scenarios filled with fun and surprises to build your leadership abilities.
